Humans and Other Animals Barbara Noske, 1989 **Humans and Animals: Intersecting Lives and Worlds** Anja Höing, Arieahn Matamonasa Bennett, 2016 Relationships between humans and non human animals are deeply complex and often governed by tensions and paradoxes Both wild and domestic metaphorical and real assistants and adversaries animals effortlessly bridge cultural and natural spaces and form an integral part of human lives This volume addresses several currently debated topics in science and culture How shall we rethink rebuild and re envision our relationships with other animals How do we construct ideas of the animal How can we negotiate animal interests against our own In which ways do we make sense and use of animals in human cultural spaces Addressing the non human animal from the standpoint of various social and cultural constructions from a global and multidisciplinary perspective the chapters within this volume do not seek to answer these questions but rather to draw attention to the complexity of the underlying issues and the manifold dimensions of the animal human bond **Humans in an Animal's World - How Non-Human Animals Perceive and Interact with Humans** Christian Nawroth, Luigi Baciadonna, Nathan J. Emery, 2021-10-20 *Perceiving Animals* Erica Fudge, 2002 The boundaries between human and beast forged a rugged philosophical landscape across early modern England Spectators gathered in London's Bear Garden to watch the callous and brutal baiting of animals A wave of new scientists performed vivisections on live animals to learn more about the human body In *Perceiving Animals* the British scholar Erica Fudge traces the dangers and problems of anthropocentrism in texts written from 1558 to 1649 Meticulous examinations of scientific legal political literary and religious writings offer unique and fascinating depictions of human perceptions about the natural world Views carried over from bestiaries medieval treatises on animals posited animals as nonsentient beings whose merits were measured solely by what provisions they afforded humans food medicine clothing travel labor scientific knowledge Without consciences or faith animals were deemed far inferior to humans While writings from the period asserted an enormous biological superiority Fudge contends actual human behavior and logic worked sometimes accidentally to close the alleged gap In the Bear Garden even a man of the lowest social rank had power over a tortured animal sinking him though below the beasts The beast fable itself fails to show a true understanding of animals as it merely attributes human characteristics to beasts in an attempt to teach humanist ideals Scholars and writers continually turned to the animal world for reflection Despite this scientists of the period used animals for empirical and medical knowledge recognizing biological and spiritual similarities but refusing to renege human superiority Including an insightful reexamination of Ben Jonson's Volpone and fascinating looks at works by Francis Bacon Edward Coke and Richard Overton among others Fudge probes issues of animal ownership and biological and spiritual superiority in early modern England that resonate with philosophical quandaries still relevant in contemporary society *Animals Make Us Human* Temple Grandin, Catherine Johnson, 2009 The author of *Animals in Translation* employs her own experience with autism and her background as an animal scientist to show

how to give animals the best and happiest life **Experimenting with Humans and Animals** Anita Guerrini, 2003-07-02

Ethical questions about the use of animals and humans in research remain among the most vexing within both the scientific community and society at large. These often rancorous arguments have gone on however with little awareness of their historical antecedents. Experimentation on animals and particularly humans is often assumed to be a uniquely modern phenomenon but the ideas and attitudes that encourage the biological and medical sciences to experiment on living creatures date from the earliest expression of Western thought. Here Anita Guerrini looks at the history of these practices from vivisection in ancient Alexandria to present day battles over animal rights and medical research employing human subjects. Guerrini discusses key historical episodes including the discovery of blood circulation, the development of smallpox and polio vaccines and recent AIDS research. She also explores the rise of the antivivisection movement in Victorian England, the modern animal rights movement and current debates over gene therapy. From publisher description *Humans, Animals, and U.S. Society in the Long Nineteenth Century: A Documentary History* Dominik Ohrem, 2025-11-18

Volume II continues the discussion of animals, animality in U.S. social and scientific thought to address the ways in which the nexus of ideas surrounding human-animal distinctions became intertwined with interhuman hierarchies and power relations including through the synergistic dynamics between race and species as co-implicating taxonomies of power. Claire Jean Kim that informed both chattel slavery and settler violence against Indigenous peoples. A second section traces the evolution of animal advocacy from early individual voices to the formation of an organized movement following the Civil War, documenting a shift however limited by structural constraints from largely anthropocentric concerns with the social consequences of human cruelty towards other creatures to a broader moral consideration for nonhuman animals in their own right *Beastly Natures* Dorothee Brantz, 2010-08-03

Although the animal may be as Nietzsche argued, ahistorical, living completely in the present, it nonetheless plays a crucial role in human history. The fascination with animals that leads not only to a desire to observe and even live alongside them but to capture or kill them is found in all civilizations. The essays collected in *Beastly Natures* show how animals have been brought into human culture, literally helping to build our societies as domesticated animals have done or contributing often in problematic ways to our concept of the wild. The book begins with a group of essays that approach the historical relevance of human-animal relations seen from the perspectives of various disciplines and suggest ways in which animals might be brought into formal studies of history. Differences in species and location can greatly affect the shape of human-animal interaction and so the essays that follow address a wide spectrum of topics including the demanding fate of the working horse, the complex image of the American alligator at turns a dangerous predator and a tourist attraction, the zoo gardens of Victorian England, the iconography of the rhinoceros and the preference it reveals in society for myth over science, relations between humans and wolves in Europe and what we can learn from society's enthusiasm for political animals such as the pets of the American presidents and the Soviet Union's space dogs. Taken together, these essays

Shared Lives of Humans and Animals Tuomas Räsänen, Taina Syrjämaa, 2017-04-21 The book focuses on animal agency and interactions between humans and animals It explores the reciprocity of human animal relations and the capacity of animals to act and shape human societies The chapters draw on examples from the Global North to explore questions of how industrialization urbanization and human life in modernity have been a

Domestic Animals, Humans, and Leisure Janette Young, Neil Carr, 2018-01-29 Domestic animals are an integral component of human leisure experience and can enhance the physical social and mental wellbeing of humans The interplay of human and animal experiences of justice wellbeing rights and roles within leisure is the central theme of this book Research explores the position of domesticated animals in human leisure experiences in a wide array of leisure settings Chapters question whether domestic animals may have a desire for leisure that is different from human leisure whether animals have and wish to fulfil needs for meaningful leisure or non leisure and whether human leisure needs and desires may coincide or contradict wellbeing interests of animals This book provides a venue for the dissemination and exploration of research which champions the welfare and rights of these animals to have their needs and interests in leisure recognised It moves the debate about animals in leisure beyond the current limits which have seen research mainly confined to the exotic other rather than more mundane everyday domestic animals This book will be of interest to individuals in the fields of tourism ethics zoology animal behaviour and leisure studies
