Asylum Inside The Closed World Of State Mental Hospitals:

Asylum Christopher Payne, 2009-09-04 Powerful photographs of the grand exteriors and crumbling interiors of America's abandoned state mental hospitals For more than half the nation's history vast mental hospitals were a prominent feature of the American landscape From the mid nineteenth century to the early twentieth over 250 institutions for the insane were built throughout the United States by 1948 they housed more than a half million patients The blueprint for these hospitals was set by Pennsylvania hospital superintendant Thomas Story Kirkbride a central administration building flanked symmetrically by pavilions and surrounded by lavish grounds with pastoral vistas Kirkbride and others believed that well designed buildings and grounds a peaceful environment a regimen of fresh air and places for work exercise and cultural activities would heal mental illness But in the second half of the twentieth century after the introduction of psychotropic drugs and policy shifts toward community based care patient populations declined dramatically leaving many of these beautiful massive buildings and the patients who lived in them neglected and abandoned Architect and photographer Christopher Payne spent six years documenting the decay of state mental hospitals like these visiting seventy institutions in thirty states Through his lens we see splendid palatial exteriors some designed by such prominent architects as H H Richardson and Samuel Sloan and crumbling interiors chairs stacked against walls with peeling paint in a grand hallway brightly colored toothbrushes still hanging on a rack stacks of suitcases never packed for the trip home Accompanying Payne's striking and powerful photographs is an essay by Oliver Sacks who described his own experience working at a state mental hospital in his book *Awakenings* Sacks pays tribute to Payne's photographs and to the lives once lived in these places where one could be both mad and safe

Occupation: ruin, repudiation, revolution Lynn Churchill,Dianne Smith,2016-03-03 Bringing together an international range of contributors from the fields of practice theory and history this book takes a fresh look at occupation It argues that occupation is a prospect that begins with ruin a residue

from the past an implied or even a resounding presence of something previous that holds the potential for transformation This prospect invites us to repudiate re imagine and re define lived space thereby asserting occupation as an act of revolution Authors drawn from the fields of architecture urbanism interior architecture dance dramaturgy art history design and visual arts cultural studies and media studies provide a unique holistic view of occupation examining topics such as the authority of architecture architecture as an act of revolution women in hypersexual space occupation as a serialized act of ruin and the definition of space as repudiation They discuss how acts that re invent territory and or shift boundaries psychological social and physical affect identity and demonstrate possession This theme of occupation is significant and topical at a time of radical flux generated by the proliferation of hypermedia and also by the dramatically shifting environmental political and economic context of this era The book concludes by asserting that it is through occupation private and public real virtual remembered re invented that we appear or disappear as the individual or collective self because the spaces we construct assert particular agendas which we may either contest or live in accord with Landscapes of Liminality Dara Downey,Ian Kinane,Elizabeth Parker,2016-11-16 Landscapes of Liminality expands upon existing notions of spatial practice and spatial theory and examines more intricately the contingent notion of liminality as a space of in between ness that avoids either essentialism or stasis It capitalises on the extensive research that has already been undertaken in this area and elaborates on the increasingly important and interrelated notion of liminality within contemporary discussions of spatial practice and theories of place Bringing together international scholarship the book offers a broad range of cross disciplinary approaches to theories of liminality including literary studies cultural studies human geography social studies and art and design The volume offers a timely and fascinating intervention which will help in shaping current debates concerning landscape theory spatial practice and discussions of liminality
