EBOOK: Death's Dominion: Ethics at the End of Life Simon Woods, 2006-12-16 I enjoyed reading this book very much It is very readable and well argued using real life cases and thought experiments as well The book provides the reader with a short history of and an overview of the most important issues in modern palliative care Various theoretical discussions are clearly set out such as the relationship between the hospice movement and modern palliative care between palliative care and health care in general between palliative sedation and euthanasia and the question whether euthanasia can be part of palliative care The author starts with exploring the existing debates and then develops his own arguments in a balanced and well structured way Medicine Health Care and Philosophy The text of this book is accessible the philosophical and ethical arguments are clearly articulated and relevant ethical principles are integrated into the critique of the issues making this a very useful book for nurses working in palliative as well as in general care Nursing Ethics It is crucially important for any student or researcher who is seriously considering ethical and policy matters at the end of life to embrace and tackle intellectually the issues that Woods raises in this book I would happily recommend it Journal of Medical Ethics What constitutes a good death Is it possible to arrange a good death Is killing compatible with caring This book looks at death and the issues and ethical dilemmas faced at the end of life It addresses the central issues in the field such as Withholding and withdrawing treatment Euthanasia and assisted suicide Terminal sedation The role of autonomy Palliative care Drawing on a philosophical framework the author explores end of life issues in order to reflect on the nature of the good death and how this may be achieved The book considers whether it is permissible or desirable to influence the quality of dying offering palliative sedation as a possible alternative to terminal sedation the argument is extended to examine why some forms of assisted dying can be shown to be compatible with the ideas of palliative care Consideration is also given to future developments such as life extension techniques and the ethical questions that these techniques might raise As such the book follows in the ongoing philosophical tradition to critique and analyse current thought on the topic of death encouraging self reflection in the reader and offering suggestions for practice in end of life care Death's Dominion is key reading for students and professionals involved in care of the dying as well as those with an interest in the philosophical issues surrounding end of life care

Key Concepts and Issues in

Nursing Ethics P. Anne Scott, Shane M. Scott, 2024-11-15 This second edition offers updates new topics and new short case studies based on real stories from the health care arena ensuring that each chapter of this book is rooted in descriptions of nursing practise that are grounded salient narratives of nursing care The reader is assisted to explore the ethical dimension of nursing practice what it is and how it can be portrayed discussed and analysed within a variety of practice and theoretical contexts One of the unique contributions of this book is to consider nursing not only in the context of the individual nurse patient relationship but also as a social good that is of necessity limited due to the ultimate limits on the nursing and health care resource This book will help the reader consider what good nursing looks like both within the context of limitations on resources during crises situations and under conditions of scarcity Indeed any discussion of ethical issues in nursing should be well grounded in a conceptualisation of nursing that nursing students and practising nursing can recognise accept and engage with Nursing like medicine social work and teaching has a clear moral aim to do good In the case of nursing to do good for the patient However it is vital that in the pressurised constrained post COVID 19 pandemic health service of the 21st century we help nurses explore what this might mean for nursing practice and what can reasonably be expected of the individual nurse and the nursing profession in terms of good nursing care

Uveges, 2022-08-08 Nursing Ethics and Professional Responsibility in Advanced Practice Fourth Edition remains the only comprehensive textbook available on the ethical issues faced by APNs providing front line care It introduces the foundations of professional responsibility and makes difficult philosophical and ethical concepts accessible to students so they can facilitate their own ethical decision making The authors an APN and ethicist demystifies the principles and language of healthcare ethics Beginning from a foundation of nursing practice this unique resource guides students in developing ethical decision making skills they can apply to a range of circumstances from everyday issues to complex dilemmas The updated Fourth Edition features expanded information on social justice including advocacy for vulnerable populations and global issues as well as new discussions on managing social media electronic health records and ethical issues specific to CRNAs and CNSs

Death'S Dominion: Ethics At The End Of Life Woods, Simon, 2006-12-01 Drawing on a philosophical framework the author explores end of life issues in order to reflect on the nature of the good death and how this may be achieved The book considers whether it is permissible or desirable to influence the quality of dying of

Clinical Ethics Handbook for Nurses Pamela Grace, Aimee Milliken, 2022-05-05 This handbook provides tools for nurse educators ethics educators practicing nurses and allied health professionals for developing confidence and skill in ethical decision making in interdisciplinary settings such as acute and chronic care hospitals and clinics It is useful for all healthcare personnel who face ethical issues in the course of their work and who work with nurses to resolve these issues While the content is based on a US context the concerns of nurses internationally are discussed and emphasized Nurses working in acute and chronic care settings face many obstacles to

providing good care and are often the first line of defense related to patient safety and meeting the needs of patients and their families. Some of the obstacles to optimal patient care are institutional, some sociocultural, and others the result of inadequate communication. Evidence points to the idea that while nurses do have the knowledge and skills to address practice problems of various sorts, they may not be confident in their skills of ethical decision making and advocacy actions. This is a resource to develop moral agency on behalf of individuals and to address broader barriers to good care raised at the local, community, or social levels. Journal of Palliative Care, 2003
