A Question Of Time The Ultimate Paradox:

A Question of Time Scientific American Editors, 2012-11-30 A Question of Time The Ultimate Paradox by the Editors of Scientific American What time is it That simple question is probably asked more often in contemporary society than ever before In our clock studded world the answer is never more than a glance away and so we can blissfully partition our days into ever smaller increments for ever more tightly scheduled tasks Modern scientific revelations about time however make the question endlessly frustrating If we seek a precise knowledge of the time the infinitesimal flash of now dissolves into a scattering flock of nanoseconds Because we are bound by the speed of light and the velocity of nerve impulses our perception of the present reflects the world as it occurred an instant ago for all that human consciousness pretends otherwise we can never catch up Even in principle perfect synchronicity escapes us Relativity dictates that like a strange syrup time flows slower on moving trains than in the stations and faster in the mountains than in the valleys The time for our wristwatch is not exactly the same as the time for our head This eBook A Question of Time summarizes what science has discovered about how time permeates and guides both our physical world and our inner selves That knowledge should enrich the imagination and provide practical advantages to anyone hoping to beat the clock or at least to stay in step with it Synchronize your watches

The Motion Paradox Joseph Mazur, 2007-04-19 The epic tale of an ancient unsolved puzzle and how it relates to all scientific attempts to explain the basic structure of the universe At the dawn of science the ancient Greek philosopher Zeno formulated his paradox of motion and amazingly it is still on the cutting edge of all investigations into the fabric of reality Zeno used logic to argue that motion is impossible and at the heart of his maddening puzzle is the nature of space and time Is space time continuous or broken up like a string of beads Over the past two millennia many of our greatest minds including Aristotle Galileo Newton Einstein Stephen Hawking and other current theoreticians have been gripped by the mystery this puzzle represents Joseph Mazur acclaimed author of *Euclid in the Rainforest* shows how historic breakthroughs in our understanding of motion shed light on Zeno's paradox The orbits of the planets were explained the laws of motion were revealed the theory of relativity was discovered but the basic structure of time and space remained elusive In the tradition of Fermat's Enigma and Zero *The Motion Paradox* is a lively history of this apparently simple puzzle whose solution if indeed it can be solved will reveal nothing less than the fundamental nature of reality
