Breaking The Mould Breaking The Mould:

How to Write a PhD in Biological Sciences John Measey, 2021-11-29 You don't have to be a genius to write a PhD. Of course it will always involve a lot of hard work and dedication but the process of writing is a whole lot easier if you understand the basic ground rules. This book is a guide through the dos and don'ts of writing a PhD. It will be your companion from the point when you decide to do a PhD providing practical guidance to getting started all the way through the nuts and bolts of the writing and editing process. It will also help you to get and stay in the right mental framework and establish good habits from the beginning putting you in a commanding position later on. Examples are tailored to the biological sciences offering a unique reference for PhD students in these disciplines. Embarking on a PhD doesn't need to be daunting even if it's your first experience working within academia. Each short section focuses on writing considered by many to be the most difficult aspect of a PhD and delves into a practical detail of one aspect from the title to the supplementary material. Whether you're a student just starting your studies an early career researcher or a supervisor struggling to cope the book provides the insider information you need to get ahead. Change Management in Information Services Lyndon Pugh, 2016-04-15

Information services are currently going through what is probably the most significant period of change in their history. At the same time thinking about organisational change in general management has continued to develop and many of the emerging ideas, strategies and processes are increasingly relevant to information services. Since the first edition of this highly regarded book was published in 2000 the pace of change has accelerated because of the influence of digitisation and technological developments in general the emergence of what might be called a business culture changes in skills and knowledge requirements and changes in user and personnel attitudes. Despite these rapid developments the current literature tends to reflect a preoccupation with technological developments at the expense of consideration for the broader managerial base. This second edition fills the gap in the literature and is fully updated with the inclusion of a number of new chapters and new case studies. The new Popular encyclopedia. Under the gen. ed. of C. Annandale Charles

Annandale, 1903 Handbook on bentonite-bonded moulding material Werner Tilch, Michael Franke, Hartmut Polzin, 2020-02-27 According to estimates modern foundries in Germany, Europe and worldwide replace about 70 % of their lost moulds with moulds made of bentonite bonded materials. The main mould components are quartz sand, bentonite and water. These components are compacted in one of the most productive procedures in the foundry. One of the main advantages of this moulding material system is the ability to restore the bonding power of most of the material. This ability creates a moulding material circulation system. This system and the use of mostly inorganic moulding materials make this creation of moulds the most environmentally friendly choice for the cast part production. Because of this circulation of moulding materials and specifically because of the bentonite water bonding system the preparation of moulds made from bentonite bonded moulding materials is very different from making moulds and cores using materials with chemical binders. This

manual describes the handling and preparation of bentonite bonded moulding materials as well as the moulding material recovery and re use after forming the cast part

Equitable Education Sameena Choudry, 2025-02-28 Never has a book on social justice and equitable education been so relevant Recent events have highlighted the huge attainment gaps that exist for many pupils within the education system due to factors outside of their control As the diversity of the pupil population increases it is more important than ever to develop the skills knowledge and understanding within the teaching profession around issues of equality and inclusion This book provides trainees and teachers with an in depth understanding of the complex issues related to the attainment of key groups of disadvantaged pupils and practical strategies that can be deployed to address these gaps Chapters focus on social class gender English as an additional language minority ethnic achievement gypsy Roma and travellers refugee and asylum seekers and those with special educational needs and disabilities The book takes a stark look at the evidence and statistics provides an overview of the key issues and considerations for each particular group and suggests key resources and examples of good practice along with case studies and points for reflection Ultimately it encourages you to have high expectations of your pupils and to truly believe that you can help them realise their ambitions and aspirations This is a powerful and timely consideration of the ways in which education has the capacity to make a difference Packed full of evidence informed strategies this book considers the range of ways that schools can respond positively to build far greater equity for all Sameena Choudry s contribution is authoritative and compelling and deserves our full attention Dame Alison Peacock
