Bridges Between Science Society And Policy:

Bridges between Science, Society and Policy Michael Decker, Miltos Ladikas, 2013-03-09 The Europäische Akademie zur Erforschung von Folgen wissenschaftlich technischer Entwicklungen Bad Neuenahr Ahrweiler GmbH European academy is concerned with the scientific study of the consequences of scientific and technological advance for the individual and social life and for the natural environment The main focus is to examine foreseeable mid and long term processes that are especially influenced by natural and engineering sciences and the medical disciplines The academy fulfills this task by organizing interdisciplinary expert discussions Another important issue of the work of the Europäische Akademie concerns the methodology of Technology Assessment as a general issue This is the main reason that the European academy organized during the past two years a project funded by the European Commission on Technology Assessment Methods and Impact TAMI Together with partners from all over Europe a common understanding of what Technology Assessment TA is supposed to do was developed Most importantly it was acknowledged that the core of any TA activity has to be a sound scientific understanding of the relevant phenomena Communication then is of cordial importance to reach the relevant decision makers as well as the general public It is true that this phase of the TA process has been treated with too little attention for many years The communication processes between scientific advisers and policy makers have hence to be further scrutinized

Encyclopedia of Nanoscience and Society David H. Guston, 2010 Because of their far reaching consequences truly transformative technologies always generate controversy This encyclopedia covers the ethical legal policy social economic and business issues raised by nanoscience

Ethics and Technology Assessment: A Participatory Approach Matthew Cotton, 2014-06-11 Whether it is nuclear power geo engineering or genetically modified foods the development of new technologies can be fraught with complex ethical challenges and political controversy which defy simple resolution In the past two decades there has been a shift towards processes of Participatory Technology Assessment designed to build channels of two way communication between technical specialists and non expert citizens and to incorporate multiple stakeholder perspectives in the governance of contentious technology programmes This participatory turn has spurred a need for new tools and techniques to encourage group deliberation and capture public values moral and choices This book specifically examines the ethical dimensions of controversial technologies and discusses how these can be evaluated in a philosophically robust manner when the ones doing the deliberating are not ethicists legal or technical experts Grounded in philosophical pragmatism and drawing upon empirical work in partnership with citizen stakeholders this book presents a model called Reflective Ethical Mapping a new meta ethical framework and toolbox of techniques to facilitate citizen engagement with technology ethics

Science and Technology Governance and Ethics Miltos Ladikas, Sachin Chaturvedi, Yandong Zhao, Dirk Stemmerding, 2015-01-26 This book analyzes the possibilities for effective global governance of science in Europe India and China Authors from the three regions join forces to explore how ethical concerns over new

technologies can be incorporated into global science and technology policies The first chapter introduces the topic offering a global perspective on embedding ethics in science and technology policy Chapter Two compares the institutionalization of ethical debates in science technology and innovation policy in three important regions Europe India and China The third chapter explores public perceptions of science and technology in these same three regions Chapter Four discusses public engagement in the governance of science and technology and Chapter Five reviews science and technology governance and European values The sixth chapter describes and analyzes values demonstrated in the constitution of the People's Republic of China Chapter Seven describes emerging evidence from India on the uses of science and technology for socio economic development and the quest for inclusive growth In Chapter Eight the authors propose a comparative framework for studying global ethics in science and technology The following three chapters offer case studies and analysis of three emerging industries in India China and Europe new food technologies nanotechnology and synthetic biology Chapter 12 gathers all these threads for a comprehensive discussion on incorporating ethics into science and technology policy The analysis is undertaken against the backdrop of different value systems and varying levels of public perception of risks and benefits The book introduces a common analytical framework for the comparative discussion of ethics at the international level The authors offer policy recommendations for effective collaboration among the three regions to promote responsible governance in science and technology and a common analytical perspective in ethics

Technology Assessment in Practice and Theory Armin Grunwald, 2018-11-08 Technological advance affects almost all areas of human life Rapid digitization increased mobility new biotechnologies and nanotechnology deeply influence amongst others industrial production entertainment work military affairs and individual life Besides overwhelmingly positive effects on wealth comfort innovation and development this also raises questions of unintended effects of tensions with democracy of the role of citizens and of its sustainability facing environmental issues Tools and procedures are needed to cope with this challenging situation Technology assessment TA has been developed more than fifty years ago to enable science the economy and society to harvest the potential of new technology to the maximum extent possible and to deal responsibly with possible adverse effects It was developed more than 50 years ago in the U S Congress and has diversified considerably in the meantime Parliamentary TA in many European states and at the international level participatory TA at the local and regional levels worldwide and TA as part of engineering processes are the most relevant fields today Technology assessment is a growing field of interdisciplinary research and scientific policy advice This volume a gives an overview of motivations of TA its history and its current practices b develops a fresh theoretical perspective on TA rooted in social theory and philosophy and c draws conclusions from the theoretical perspective for the further development of TA's practices It provides the first comprehensive view on the growing field of TA at the international level

Teaching Design For Values Roberto Rocco, Amy Thomas, María Novas-Ferradás, 2022-12-08 The process of identifying interpreting and implementing societal values in university education is an essential part of

responsible innovation and designing for equitable inclusive and sustainable societies While there is now a well defined and growing body of research on the theory and application of designing for values or value sensitive design at present the pedagogical dimension remains underexplored Teaching Design for Values A Companion is a resource for teachers of design based disciplines who wish to foreground values more explicitly in their classes With fourteen chapters written by both TU Delft educators and international contributors the book aims to examine the concepts methods and experiences of teaching design for values within a variety of fields including urbanism engineering architecture artificial intelligence and industrial design Through its multi disciplinarity Teaching Design for Values proposes an expanded definition of design to encompass a broad range of disciplines and processes that deal generally with future imagining and future building including process management In doing so it explores the ways that values may be expressed and analysed in a variety of different pedagogical contexts

Climate Change Adaptation in Practice Philipp Schmidt-Thome, Johannes Klein, 2013-04-17 Climate change adaptation is increasingly recognized as complementary part to climate change mitigation Climate change affects sea level the extent of flood prone areas and precipitation patterns among many others To adapt to these changes the tasks of municipalities and cities are to implement policies and strategies for changes in land use and coastal management as part of their future development It is of vital importance to address the uncertainties of climate change scenarios when proposing adaptation measures that are socially viable and economically reasonable The decision making process promoted here is based on scientific excellence as well on an integrated communication process This book provides a comprehensive overview of key elements required for effective analysis and assessment of climate change impacts economic cost benefit analysis communication processes and creation and transfer of knowledge governance issues and implementation of related policies It describes the results achieved by the BaltCICA www.baltcica.org project whose contributors come from the scientific and public administration communities The regional cooperation has led to the implementation of climate change adaptation in several case studies The BaltCICA project developed concepts methodologies and tools for climate change adaptation that can be translated across other global regions Scientists and students working on the development of climate change and adaptation strategies public administrators in the related fields on local regional and state level including environment water management civil defense as well as professionals working with adaptation technologies including engineering technological solutions urban planning agencies and construction will value this innovative book
