
CPIM Part 1 Module 4 Summary notes

supplier *** 1) provider of goods or services 2) seller with whom the buyer does business, as opposed to vendor, which is a generic term referring to all sellers in the marketplace

purchasing *** The term used in industry and management to denote the function of and the responsibility for procuring materials, supplies, and services.

procurement *** The business functions of procurement planning, purchasing, inventory control, traffic, receiving, incoming inspection, and salvage operations.

physical supply *** The movement and storage of goods from suppliers to manufacturing. The cost of physical supply is ultimately passed on to the customer.

landed cost *** This cost includes the product cost plus the costs of logistics, such as warehousing, transportation, and handling fees.

Total Cost of Ownership (TCO) *** In supply chain management, the total cost of ownership of the supply delivery system is the sum of all the costs associated with every activity of the supply stream. The main insight that _____ offers to the supply chain manager is the understanding that the acquisition cost is often a very small portion of the total cost of ownership.

dock-to-stock *** A program through which specific quality and packaging requirements are met before the product is released. Prequalified product is shipped directly into the customer's inventory. _____ eliminates the costly handling of components, specifically in receiving and inspection, and enables product to move directly into production, sometimes referred to as ship-to-stock

supplier relationship management (SRM) *** A comprehensive approach to managing an enterprise's interactions with the organizations that supply the goods and services the enterprise uses. The goal of SRM is to streamline and make more effective the processes between an enterprise and its suppliers. SRM is often associated with automating procure-to-pay business processes, evaluating supplier performance, and exchanging information with suppliers. An e-procurement system is often an example of an SRM family of applications

supplier certification *** Certification procedures verifying that a supplier operates, maintains, improves, and documents effective procedures that relate to the customer's requirements. Such requirements can include cost, quality, delivery, flexibility, maintenance, safety, and ISO quality and environmental standards.

certified supplier *** A status awarded to a supplier that consistently meets predetermined quality, cost, delivery, financial, and count objectives. Incoming inspection may not be required.

quality *** fitness for use. value-based quality is the degree of excellence at an acceptable price. conformance to requirements.
