Beyond Training Perspectives On Language Teacher Education Cambridge Language Teaching Library:

Beyond Training Jack C. Richards,1998-02-13 Beyond Training examines the nature of second language teacher development and how teachers practices are influenced by their beliefs and principles It seeks to move discussion of language teacher development beyond the level of training which reflects a technical view of specific teaching practices Instead it takes a more holistic approach to teacher development built on the notion of the teacher as critical and reflective thinker The argument pursued throughout is that teacher education needs to engage teachers not merely in the mastery of techniques but in an exploration of the knowledge beliefs and attitudes that underly their teaching practices The Experience of Language Teaching Rose Senior,2006-02-23 Through the words of more than 100 practising language teachers The Experience of Language Teaching provides a detailed picture of teaching and learning in communicative classrooms Using a teacher generated framework it covers a range of aspects of classroom life how teachers create environments suitable for language practice how they get students on side how they manage tricky students how they enhance the learning experience how they develop and maintain a spirit of community The book demonstrates how paying attention to both the learning and social needs of their class groups enables language teachers to behave in flexible ways that promote learning This book will be of interest to teachers teacher educators researchers and to anyone interested in finding out what it is like to be a language teacher at the present time The Experience of Language Teaching was winner of the Ben Warren International Trust House Prize in 2005 Researching Language Teacher Cognition and Practice Roger Barnard,Anne Burns,2012-09-03 This book presents a wide range of methodological perspectives on researching what teachers think and do in language teaching It contains chapters by the editors and a leading teacher cognition researcher that highlight key themes as well as eight case studies by new researchers recounting their experience of designing and using data collection tools **Materials Development in Language Teaching** Brian Tomlinson,1998-03-05 This book engages with current issues in developing materials for language teaching Interactive Language Teaching Wilga M. pitfalls that come with rolling out holistic approaches to education To do so the proceedings focus on the subthemes Support and Development Mobility and Diversity and Networking and Collaboration in Holistic Education Approaches and Methods in Language Teaching Jack C.
