Economic Development, Agriculture And Climate Change Antonio Yunez Naude, Jorge Mora-rivera, 2023-02-24

Climate change CC is currently an unquestionable phenomenon If not stopped it will be catastrophic for life on earth Scientific evidence shows that human activities are the primary driver of CC tendencies since the industrial times In this book we present the relationship between development and CC with special reference to agriculture the rural sector and policies aimed to promote sustainable development We also give special attention to the situation in low and medium income countries particularly rural households and small farmers in these countries The study of agriculture CC and sustainability requires consideration of natural resources and their uses land freshwater forests etc as well as the rural sector since land for agricultural production often expands at the expense of forests In addition the use of water for agricultural production affects the availability of this resource for other uses in the urban industrial and service sectors Consequently sustainable agricultural development under CC requires an interdisciplinary or at least a multidisciplinary approach In this book we do our best to deal with this challenge by focusing on issues and topics related to agriculture and its use of natural resources in the context of CC but without ignoring the interrelations of these phenomena with further aspects of sustainability beyond agriculture
