Autistic Transformations Bions Theory And Autistic Phenomena:

Autistic Transformations Celia Fix Korbivcher, 2018-05-15 This book is a collection of articles written between 1992 and 2005 which attempts to bring two universes together Bion's referential and autistic phenomena The field of clinical work which the author uses is that of learning from the emotional experience Bion 1962 and the theory of Transformations Bion 1965 a method of observing mental phenomena within this field which also encompasses the areas of neurosis and psychosis The author makes use of Tustin's concept 1965 which proposes that the personality has apart from the neurotic and psychotic parts an autistic part in which prevails sensations in place of emotions The author suggests adding an autistic area to the theory of Transformations proposing a new type of transformation beyond those suggested by Bion the autistic transformations The merit of this proposal is to expand Bion's referential to the autistic area an area dominated by sensations without representation in the mind The W.R. Primitive Mental States Jane Van Buren, Shelley Alhanati, 2013-12-16 Traditional psychoanalysis relies on the presence of certain meaning making capacities in the patient for its effectiveness Primitive Mental States examines how particular capacities including those for symbolising fantasising dreaming experiencing and finding meanings in those experiences can be taken for granted Many of us lack these capacities in certain dimensions of our minds making traditional psychoanalysis ineffective In this book international contributors are brought together to consider a radical evolution in contemporary psychoanalytic theory developed from a combination of ultrasound studies infant analysis and observation of mothers and babies These findings demonstrate how much mental life exists even before birth and considers unevolved unborn and barely born aspects of the self such as the birth of emotion and the birth of alpha functioning Topics covered include prenatal imprints on the mind and body difficult to treat patients non verbal non symbolic disembodied states of being early relational and attachment trauma Illustrated throughout with original data and extensive clinical discussions from some of the biggest names in the field Primitive Mental States will be a useful resource for students and seasoned analysts alike Meltzer in Sao Paulo Marisa P Melega, 2017-04-01 This book is one of a series that record Donald Meltzer's clinical seminars and supervisions which were conducted in various countries on a regular basis over many years Despite his interest in the theoretical advances of psychoanalysis made during what he termed The Kleinian Development Meltzer believed that clinical supervision was the only way to teach psychoanalytic practice In effect he treated supervision as an art form just as he regarded psychoanalysis as an art form The library of his supervision work almost all recorded outside the UK thus forms a valuable teaching model for future practitioners as well as demonstrating Meltzer's wealth of insight into both character development and analytic technique *The Psychoanalyst, the Theatre of Dreams and the Clinic of Enactment* R.M.S. Cassorla, 2018-03-15 This book is recommended to psychoanalysts and therapists interested in the analytical technique and

particularly that work with patients who have deficits in their symbolization capacity It presents studies of technical aspects of the analytical process with patients who are difficult to reach Collusions named chronic enactments show that the analytic dyad cannot dream and the analytical field is paralyzed without the analyst perceiving it Chronic enactments are undone through unconscious acts or behaviours that threaten to destroy the analytical process behaviours that are named acute enactments The thorough study of these enactments show that they take the dyad to an awareness of the discrimination between self and object and re establish the capacity to dream It is demonstrated that this occurs in an attenuated traumatic form revealing in the analytical field the externalization of primitive non dreamed traumas Clinical artistic and mythical models are part of the discussion The emphasis on clinical aspects allows readers to use different theories to consider the clinical facts The clinical theories used by the author are mostly post Kleinian and Bionian
