BIM Design Richard Garber, 2014-08-11 Building information modelling BIM is revolutionising building design and construction For architects BIM has the potential to optimise their creativity while reducing risk in the design and construction process thus giving them a more significant role in the building process This book demonstrates how innovative firms are using BIM technologies to move design away from the utilitarian problems of construction engaging them in a stunning new future in the built environment Whereas recent books about BIM have tended to favour case study analyses or instruction on the use of specific software BIM Design highlights how day to day design operations are shaped by the increasingly generative and collaborative aspects of these new tools BIM strategies are described as operations that can enhance design rather than simply make it more efficient Thus this book focuses on the specific creative uses of information modelling at the operational level including the creative development of parametric geometries and generative design the evaluation of environmental performance and the simulation and scheduling of

construction fabrication operations This book also engages BIM's pragmatic efficiencies such as the conflict checking of building systems and the creation of bills of quantities for costing and in so doing it demonstrates how BIM can make such activities collaborative Throughout projects are used to illustrate the creative application of BIM at a variety of scales These buildings showcase work by firms executing projects all over the world SHoP Architects and Construction New York Morphosis Los Angeles Populous London GRO Architects New York Reiser Umemoto New York Gensler Shanghai and UNStudio Amsterdam Autodesk Robot Structural Analysis Professional 2016 Ken Marsh, 2016 *Fabricate* Achim Menges, Bob Sheil, Ruairi Glynn, Marilena Skavara, 2017-04-03 Bringing together pioneers in design and making within architecture construction engineering manufacturing materials technology and computation Fabricate is a triennial international conference now in its third year ICD University of Stuttgart April 2017 The 2017 edition features 32 illustrated articles on built projects and works in progress from academia and practice including contributions from leading practices such as Foster Partners Zaha Hadid Architects Arup and Ron Arad and from world renowned institutions including ICD Stuttgart Harvard Yale MIT Princeton University The Bartlett School of Architecture UCL and the Architectural Association Each year it produces a supporting publication to date the only one of its kind specialising in Digital Fabrication
