Learning: Become a Super Learner Learn Speed Reading and Advanced Memorization (Proven Advanced Strategies for Effective Memorization, Better Organization, and Unbreakable Concentration) Santo Silva, Accelerated learning is an advanced learning approach that is used in many organizations today including learning institutions and corporate entities It is research based and includes a variety of media and techniques As opposed to the traditional laidback learning approaches where the student assumes a passive role and the trainer actively pushes knowledge his way accelerated learning is more flexible and open ensuring that every learner is totally involved Accelerated learning methods vary greatly with respect to the structure of the organization the subject matter in question and the learners Here Is A Preview Of What You ll Learn Fundamentals Of Accelerated Learning Ways To Improve Your Memory Learning More Efficiently And Effectively Tips For Time Management Basics Of Speed Reading Note Taking Techniques Much Much More This e book was written as a dedication to passing on information and knowledge which is one of the fundamental cores of any learning process Discover the secrets of accelerated learning and master a skill that will literally open up your mind to new things wherever you look **Accelerated Learning - Advanced Technique for Fast Learning** Thomas

Abreu,2015-02-18 Accelerated learning is an advanced learning approach that is used in many organizations today including learning institutions and corporate entities It is research based and includes a variety of media and techniques As opposed to the traditional laidback learning approaches where the student assumes a passive role and the trainer actively pushes knowledge his way accelerated learning is more flexible and open ensuring that every learner is totally involved It brings in energy and re humanizes the learning process making it more enjoyable and productive Accelerated learning methods vary greatly with respect to the structure of the organization the subject matter in question and the learners In the words of Jacques Barzun teaching is not application of a system but rather an exercise in perpetual discretion The main aim of a learning process is not the method used but rather the results that it gives Accelerated learning scores highly in this regard

Hundreds of organizations all over the world have embraced accelerated learning and the number of those that are joining in is rising by day. This is because people have discovered that accelerated learning uses proven techniques that enable them to design programs faster, improve measurable learning, and enhance the productivity and creativity of employees. In order to be successful in accelerated learning, you need both a skeptical approach and an open mind. Healthy skepticism will enable you to rethink your assumptions about learning and at the same time enable you to maintain a balanced head even as you crunch the dazzling techniques and methods in the accelerated learning process. Openness, on the other hand, will help you to appreciate that learning is a continual process and no one has seen it all. New possibilities are always knocking at your door and it is up to you to respond with an open mind. Openness will help you to appreciate that nothing is dormant but rather continually evolving. At times you have to depart from your organizational culture and the way you do things so that you can experience the joy that comes with new approaches. Therefore, having skepticism and openness will help you in distinguishing between the real and the artificial in the learning environment. This will in turn open up better ways of optimizing learning and enjoying even greater success in your tasks. The high metabolism culture that we live in requires that we update our learning approaches so as to meet the demands and challenges of life. The kinds of updates that we need to make are more of systemic rather than cosmetic. We need to move from the mechanistic way of thinking that the conventional learning methods have taught us all through right from the early days of industrial economy. In the learning environment today, standardization, one size fits all, and behavioral conditioning are principles that no longer produce the desired results. These principles were only effective in preparing people for repetitive and dreary tasks. The kind of learning that will produce tangible results is to focus on creating knowledgeable workers and students who have the ability to absorb and adjust to new information. Accelerated learning ignites people's minds and enhances their psychological powers for thinking, innovating, problem solving, and learning. As you go through the chapters of this book, you will appreciate gradually that all of us are in a learning era which is characterized by genuine collaboration, total learning involvement, diversity, and variety in learning methods and internal motivation. The survival and health of organizations and individuals today depends on their ability to learn.

Learning quickly can be done by anyone. It suffices simply to follow the universal laws and to see their effects. So even if you have an IQ of 78 and you are never motivated by learning, you should know that you can increase your IQ up to 160. This simply involves using the memorization processes that improve memory and make it more efficient. In this book, you learn how to memorize without much effort and better. For a few decades, scientists have been interested in memory. The results are amazing. You can now learn even in your sleep. The evidence is irrefutable. This is how you can increase the efficiency of your memory by 10 without even having the impression of really learning. And you can even do better. You can use objects around you to turn your surrounding energy into mental energy. This has the effect of memorizing better and again. Here are a few of the mental tips that are packed in this publication. The development of

mnemonics Mastery of word and number sequences Mastering a foreign language in no time Developing the skill of speed reading Developing and managing holographic memory Mental exercises Mind mapping and mind mapping tools And many other tips to discover yourself Here are the techniques that will allow you to have the right mental behaviors to use your entire brain These have the effect of a deep and very fast memorization of everything you want Each technique has a role in the use of the entire brain All used together they will allow you to immediately increase your memory by 10 or 15 times more Some of these can be used to memorize at a depth of desorption you want Accelerated learning techniques allow you to put information in all areas of the brain Additionally I explain how to use techniques of imaginary travel to use areas of logic in the brain and to create more brain connections Also bulk memory to put multiple information at the same time in the brain and other techniques always more powerful than each other If you want the majority of A and A in all you do you need to understand that having A s and A s can become very easy once you apply the right tips I show you how to have a precision of memory with the real things that work You can even choose the grade that you will have in each class real classroom or in a real life scenario If you want a B you will easily have a B If you want an A then it will be easy for you to have an A I wait for you on the pages of my book
