Beggars Iconoclasts And Civic Patriots The Political Culture Of The Dutch Revolt:

Beggars, Iconoclasts, and Civic Patriots Peter J. Arnade, 2008 A new history of the Dutch Revolt that shows how the act of rebellion forged a political identity through ritual symbol and public action *Dissident Identities in the Early Modern Low Countries* Alastair Duke, Andrew Spicer, 2016-12-05 Alastair Duke has long been recognized as one of the leading scholars of the early modern Netherlands known internationally for his important work on the impact of religious change on political events which was the focus of his *Reformation and Revolt in the Low Countries* 1990 Bringing together an updated selection of his previously published essays together with one entirely new chapter and two that appear in English here for the first time this volume explores the emergence of new political and religious identities in the early modern Netherlands Firstly it analyses the emergence of a common identity amongst the amorphous collection of states in north western Europe that were united first under the rule of the Valois Dukes of Burgundy and later the Habsburg princes and traces the fortunes of this notion during the political and religious conflicts that divided the Low Countries during the second half of the sixteenth century A second group of essays considers the emergence of dissidence and opposition to the regime and explores how this was expressed and disseminated through popular culture Finally the volume shows how in the age of confessionalisation and civil war challenging issues of identity presented themselves to both dissenting groups and individuals Taken together these essays demonstrate how these dissident identities shaped and contributed to the development of the Netherlands during the early modern period **Cultures of Calvinism in Early Modern Europe**

Crawford Gribben, Graeme Murdock, 2019-11-01 Scholars have associated Calvinism with print and literary cultures with republican liberal and participatory political cultures with cultures of violence and vandalism enlightened cultures cultures of social discipline secular cultures and with the emergence of capitalism Reflecting on these arguments the essays in this volume recognize that Reformed Protestantism did not develop as a uniform tradition but varied across space and time The authors demonstrate that multiple iterations of Calvinism developed and impacted upon differing European communities that were experiencing social and cultural transition They show how these different forms of Calvinism were shaped by their adherents and opponents and by the divergent political and social contexts in which they were articulated and performed Recognizing that Reformed Protestantism developed in a variety of cultural settings this volume analyzes the ways in which it related to the multi confessional cultural environment that prevailed in Europe after the Reformation **Memory Wars in the Low Countries, 1566-1700** Jasper van der Steen, 2015-07-28 The Revolt in the Netherlands erupted in 1566 and tore apart the Low Countries In *Memory Wars in the Low Countries 1566 1700* Jasper van der Steen explains how public memories of the Revolt in the Habsburg Netherlands in the South and the Dutch Republic in the North diverged and became the objects of fierce contestation in domestic political struggles on both sides of the border and throughout the seventeenth century Against widespread assumptions about the supposed modernity of cultural memory *Memory Wars* argues that early

modern public memory did not require the presence of state actors nationalism and modern mass media in order to play a role of political importance in both North and South

The Golden Mean of Languages Alisa van de Haar,2019-09-02 In *The Golden Mean of Languages* Alisa van de Haar sheds new light on the debates regarding the form and status of the vernacular in the early modern Low Countries where both Dutch and French were local tongues The fascination with the history grammar spelling and vocabulary of Dutch and French has been studied mainly from monolingual perspectives tracing the development towards modern Dutch or French Van de Haar shows that the discussions on these languages were rooted in multilingual environments in particular in French schools Calvinist churches printing houses and chambers of rhetoric The proposals that were formulated there to forge Dutch and French into useful forms were not directed solely at uniformization but were much more diverse

The Saltwater Frontier Andrew Lipman,2015-11-03 Andrew Lipman's eye opening first book is the previously untold story of how the ocean became a frontier between colonists and Indians When the English and Dutch empires both tried to claim the same patch of coast between the Hudson River and Cape Cod the sea itself became the arena of contact and conflict During the violent European invasions the region's Algonquian speaking Natives were navigators boatbuilders fishermen pirates and merchants who became active players in the emergence of the Atlantic World Drawing from a wide range of English Dutch and archeological sources Lipman uncovers a new geography of Native America that incorporates seawater as well as soil Looking past Europeans arbitrary land boundaries he reveals unseen links between local episodes and global events on distant shores Lipman's book successfully redirects the way we look at a familiar history

Neal Salisbury Smith College Extensively researched and elegantly written this latest addition to Yale's seventeenth century American history list brings the early years of New England and New York vividly to life

Recollection in the Republics Imogen Peck,2021-04-28 Following the execution of Charles I in January 1649 England's fledgling republic was faced with a dilemma which parts of the nation's bloody recent past should be remembered and how and which were best consigned to oblivion Across the country the state's opponents local communities and individual citizens were grappling with many of the same questions as calls for remembrance vied with the competing goals of reconciliation security and the peaceful settlement of the state *Recollection in the Republics* provides the first comprehensive study of the ways Britain's Civil Wars were remembered in the decade between the regicide and the restoration Drawing on a wide ranging and innovative source base it places the national authorities attempts to shape the meaning of the recent past alongside evidence of what the English people lords and labourers men and women veterans and civilians actually were remembering *Recollection in the Republics* demonstrates that memories of the domestic conflicts were central to the politics and society of England's republican interval inflecting national and local discourses complicating and transforming inter personal relationships and infusing and forging individual and collective identities In so doing it enhances our understanding of the nature of early modern memory and the experience of post civil war states more broadly Memory was a multifaceted dynamic resource and this book emphasises its

fecundity the manifold meanings it possessed and the creativity of those who deployed it Further by situating 1650s England in relation to other post conflict societies both within and beyond early modernity it points to a consistency in some of the challenges that have confronted post civil war states across time and space

On Corruption in America Sarah Chayes, 2021-11-16 From the prizewinning journalist and internationally recognized expert on corruption in government networks throughout the world comes a major work that looks homeward to America exploring the insidious dangerous networks of corruption of our past present and precarious future If you want to save America this might just be the most important book to read now Nancy MacLean author of *Democracy in Chains* Sarah Chayes writes in her new book that the United States is showing signs similar to some of the most corrupt countries in the world Corruption she argues is an operating system of sophisticated networks in which government officials key private sector interests and out and out criminals interweave Their main objective not to serve the public but to maximize returns for network members In this unflinching exploration of corruption in America Chayes exposes how corruption has thrived within our borders from the titans of America's Gilded Age Andrew Carnegie John D Rockefeller J P Morgan et al to the collapse of the stock market in 1929 the Great Depression and FDR's New Deal from Joe Kennedy's years of banking bootlegging machine politics and pursuit of infinite wealth to the deregulation of the Reagan Revolution undermining this nation's proud middle class and union members She then brings us up to the present as she shines a light on the Clinton policies of political favors and personal enrichment and documents Trump's hydra headed network of corruption which aimed to systematically undo the Constitution and our laws Ultimately and most importantly Chayes reveals how corrupt systems are organized how they enable bad actors to bend the rules so their crimes are covered legally how they overtly determine the shape of our government and how they affect all levels of society especially when the corruption is overlooked and downplayed by the rich and well educated

Agents beyond the State Mark Netzloff, 2020-11-19 The early modern period is often seen as a pivotal stage in the emergence of a recognizably modern form of the state *Agents beyond the State* returns to this context in order to examine the literary and social practices through which the early modern state was constituted The state was defined not through the elaboration of theoretical models of sovereignty but rather as an effect of the literary and professional lives of its extraterritorial representatives Netzloff focuses on the textual networks and literary production of three groups of extraterritorial agents travelers and intelligence agents mercenaries and diplomats These figures reveal the extent to which the administration of the English state as well as definitions of national culture were shaped by England's military commercial and diplomatic relations in Europe and other regions across the globe Netzloff emphasizes the transnational contexts of early modern state formation from the Dutch Revolt and relations with Venice to the role of Catholic exiles and nonstate agents in diplomacy and international law These global histories of travel service and labor additionally transformed definitions of domestic culture from the social relations of classes and regions to the private sphere of

households and families Literary writing and state service were interconnected in the careers of Fynes Moryson George Gascoigne and Sir Henry Wotton among others As they entered the realm of print and addressed a reading public they introduced the practices of governance to an emerging public sphere **Heroines, Harpies, and Housewives** Martha Moffitt Peacock, 2020-11-16 Co Honorable Mention for the 2021 Book Award by the Society for the Study of Early Modern Women and Gender SSEMWG In Heroines Harpies and Housewives Martha Moffitt Peacock provides a novel interpretive approach to the artistic practice of Imaging Women of Consequence in the Dutch Golden Age From the beginnings of the new Republic visual celebrations of famous heroines who crossed gender boundaries by fighting in the Revolt against Spain or by distinguishing themselves in arts and letters became an essential and significant cultural tradition that reverberated throughout the long seventeenth century This collective memory of consequential heroines who equaled or outshone men is frequently reflected in empowering representations of other female archetypes authoritative harpies and noble housewives Such enabling imagery helped in the structuring of gender norms that positively advanced a powerful female identity in Dutch society
