Argument Structure Eric J. Reuland, Tanmoy Bhattacharya, Giorgos Spathas, 2007 Recent developments in the generative tradition have created new interest in matters of argument structure and argument projection giving prominence to the discussion on the role of lexical entries Particularly the more traditional lexicalist view that encodes argument structure information on lexical entries is now challenged by a syntactic view under which all properties of argument structure are taken up by syntactic structure In the light of these new developments the contributions in this volume provide detailed empirical investigations of argument structure phenomena in a wide range of languages The contributions vary in their response to the theoretical questions and address issues that range from the role of specific functional heads and the relation of argument projection with syntactic processes to the position of argument structure within a broader clausal architecture and the argument structure properties of less studied categories *Crosslinguistic Perspectives on Argument Structure* Melissa Bowerman, Penelope Brown, 2008 This book offers a unique interdisciplinary perspective on argument structure and its role in language acquisition The volume is the outcome of an integrated research project and comprises chapters by both specialists in first language acquisition and field linguists working on a variety of lesser known languages Drawing on a broad range of crosslinguistic data *Crosslinguistic Perspectives on Argument Structure* integrates important contemporary issues in linguistics and language acquisition **Current Studies in Slavic Linguistics** Irina Kor Chahine, 2013-12-15 This volume represents an overview of current research on Slavic linguistics in Europe and North America based on selected papers presented during the 6th Annual Meeting of the Slavic Linguistics Society September 1 3 2011 Aix en Provence France It includes topics across a range of linguistic fields morphosyntax syntax and semantics and discussions on specific aspects of Slavic languages within a typological perspective All the papers illustrate a range of approaches and each paper presents rigorous analysis of a set of Slavic data within the context of various models and aspects of language While the main focus of the collection is impersonal constructions in Slavic languages the book also includes morphological topics such as reflexives antipassive and evidential markers syntactical relations with zero sign auxiliary verbs and subordinate clauses and semantics of nouns adverbs and adjectives The volume will be of interest to all scholars studying Slavic languages as well as those interested in general linguistics and linguistic typology *Sign Language Research Sixty Years Later: Current and Future Perspectives* Valentina Cuccio, Erin Wilkinson, Brigitte Garcia, Adam Schembri, Erin Moriarty, Sabina Fontana, 2022-11-14 *Verbal Prepositions and Argument Structure* Mai Ellin Tungseth, 2008-04-10 This book investigates different types of verb PP combinations and examines the types of meanings which arise when the argument structure of the PP fuses with the verbal argument structure Focussing mainly on data from Norwegian the book investigates three different empirical domains of PP VP combinations and concludes that the arising interpretations result from a combination of the fine grained structure of the PP the structure of the verb phrase and the different modes of

combination The book sheds new light on the syntax semantics interplay while adding new insight about the properties of the category P in Norwegian The book also contributes to the debate between Lexicalism and Constructionism and it concludes that a moderate Constructionist model with a fine grained syntactic structure determining interpretation is best equipped to handle the enormous flexibility of verb prepositional phrase combinations of the types explored
