Automated Essay Scoring A Cross Disciplinary Perspective:

Automated Essay Scoring Mark D. Shermis, Jill C. Burstein, 2003-01-30 This new volume is the first to focus entirely on automated essay scoring and evaluation. It is intended to provide a comprehensive overview of the evolution and state of the art of automated essay scoring and evaluation technology across several disciplines including education testing and measurement, cognitive science, computer science, and computational linguistics. The development of this technology has led to many questions and concerns. Automated Essay Scoring attempts to address some of these questions including: How can automated scoring and evaluation supplement classroom instruction? How does the technology actually work? Can it improve students' writing? How reliable is the technology? How can these computing methods be used to develop evaluation tools? What are the state-of-the-art essay evaluation technologies and automated scoring systems? Divided into four parts, the first part reviews the teaching of writing and how computers can contribute to it. Part II analyzes actual automated essay scorers including e-rater™, Intellimetric, and the Intelligent Essay Assessor. The third part analyzes related psychometric issues, and the final part reviews innovations in the field. This book is ideal for researchers and advanced students interested in automated essay scoring from the fields of testing and measurement, education, cognitive science, language, and computational linguistics.

Handbook of Automated Essay Evaluation Mark D. Shermis, Jill Burstein, 2013-07-18 This comprehensive interdisciplinary handbook reviews the latest methods and technologies used in automated essay evaluation (AEE) methods and technologies. Highlights include the latest in the evaluation of performance-based writing assessments and recent advances in the teaching of writing, language testing, cognitive psychology, and computational linguistics. This greatly expanded follow-up to *Automated Essay Scoring* reflects the numerous advances that have taken place in the field since 2003, including automated essay scoring and diagnostic feedback. Each chapter features a common structure including an introduction and a conclusion. Ideas for diagnostic and evaluative feedback are sprinkled throughout the book. Highlights of the book's coverage include: The latest research on automated essay evaluation. Descriptions of the major scoring engines including the E-rater, the Intelligent Essay Assessor, the Intellimetric™ Engine, e-rater™, and LightSIDE. Applications of the uses of the technology including a large-scale system used in West Virginia. A systematic framework for evaluating research and technological results. Descriptions of AEE methods that can be replicated for languages other than English, as seen in the example from China. Chapters from key researchers in the field. The book opens with an introduction to AEEs and a review of the best practices of teaching writing along with tips on the use of automated analysis in the classroom. Next, the book highlights the capabilities and applications of several scoring engines including the E-rater, the Intelligent Essay Assessor, the Intellimetric™ engine, e-rater™, and LightSIDE. Here, readers will find an actual application of the use of an AEE in West Virginia, psychometric issues related to AEEs such as validity, reliability, and scaling, and the use of automated scoring to detect reader drift, grammatical errors, discourse coherence, quality, and the impact of human rating on AEEs. A review of the

cognitive foundations underlying methods used in AEE is also provided The book concludes with a comparison of the various AEE systems and speculation about the future of the field in light of current educational policy Ideal for educators professionals curriculum specialists and administrators responsible for developing writing programs or distance learning curricula those who teach using AEE technologies policy makers and researchers in education writing psychometrics cognitive psychology and computational linguistics this book also serves as a reference for graduate courses on automated essay evaluation taught in education computer science language linguistics and cognitive psychology
