AutoIt is becoming increasingly popular in the system administration field as a useful scripting administration tool. Although there is one of its more popular uses, you can use AutoIt in virtually anything in a Windows environment.

The powerful scripting language can run any program and manipulate Windows and system objects. With its flexibility, you, administrator, can perform such tasks as installing and uninstalling programs using installed administrative privileges.

The quick reader can find everything in the AutoIt v3 language. You will learn about variables and includes, graphical user interfaces, user-defined functions, and conditional and loop statements. You will then apply what you have learned to examples related to the system administration field. The examples in this Short Cut can be used to create anything from a game modification to a log on script that copies Windows updates
