Artificial Evolution Artificial Evolution:

Artificial Evolution Jin-Kao Hao, Evelyne Lutton, Edmund Ronald, 2014-01-15 **The Art of Artificial Evolution** Juan J. Romero, Penousal Machado, 2007-11-13 Art is the Queen of all sciences communicating knowledge to all the generations of the world Leonardo da Vinci Artistic behavior is one of the most valued qualities of the human mind Although artistic manifestations vary from culture to culture dedication to artistic tasks is common to all In other words artistic behavior is a universal trait of the human species The current Western definition of art is relatively new However a dedication to artistic endeavors such as the embellishment of tools body ornamentation or gathering of unusual arguably aesthetic objects can be traced back to the origins of humanity That is art is ever present in human history and prehistory

Art and sciences share along and during relationship The best known example of the exploration of this relationship is probably the work of Leonardo da Vinci Somewhere in the 19th century art and science grew apart but the cross transfer of concepts between the two domains continued to exist Currently albeit the need for specialization there is a growing interest in the exploration of the connections between art and science Focusing on computer science it is interesting to notice that early pioneers of this discipline such as Ada Byron and Alan Turing showed an interest in using computational devices for art making purposes Oddly in spite of this early interest and the ubiquity of art it has received relatively little attention from the computer science community in general and more surprisingly from the artificial intelligence community

Artificial Evolution Cyril Fonlupt, Jin-Kao Hao, Evelyne Lutton, 2014-01-15 *Artificial Evolution* Jean-Marc Alliot, Evelyne Lutton, Edmund Ronald, 2014-01-15 *Artificial Evolution* Pierre Collet, Cyril Fonlupt, Jin-Kao Hao, Evelyne Lutton, Marc Schoenauer, 2003-08-01 The Evolution Articielle cycle of conferences was originally initiated as a forum for the French speaking evolutionary computation community Previous EA meetings were held in Toulouse EA 94 Brest EA 95 LNCS 1063 Nîmes EA 97 LNCS 1363 Dunkerque EA 99 LNCS 1829 and finally EA 2001 was hosted by the Université de Bourgogne in the small town of Le Creusot in an area of France renowned for its excellent wines However the EA conferences have been receiving more and more papers from the international community this conference can be considered fully international with 39 submissions from non francophonic countries on all five continents out of a total of 68 Out of these 68 papers only 28 were presented orally 41% due to the formula of the conference single session with presentations of 30 minutes that all participants seem to appreciate a lot The Organizing Committee wishes to thank the members of the International Program Committee for their hard work mainly due to the large number of submissions and for the service they rendered to the community by ensuring the high scientific content of the papers presented Actually the overall quality of the papers presented was very high and all 28 presentations are included in this volume grouped in 8 sections which more or less reflect the organization of the oral session 1 Invited Paper P Bentley gave a great talk on his classification of interdisciplinary collaborations and showed us some of his work with musicians and biologists
