4th International Conference on Islamic Economics, Business, Philanthropy, and PhD Colloquium (ICIEBP)

2022 Meri Indri Hapsari, M. Bastomi Fahri Zusak, 2023-06-16 This is an open access book. The success of the 1st 2nd ICIEBP 2017 and 2018 in Universitas Pendidikan Indonesia UPI Bandung and Universitas Airlangga UNAIR Surabaya Indonesia that brought a wide range of participants did not stop the courage of us to conduct the 3rd ICIEBP virtually on 2020 adapting the pandemic situation in mind that the conference attendees gained vital insights into Islamic economics from different viewpoints. Moreover to maintain the continuity of the Islamic Economics conference in presenting insights sharing and executing ideas presented by innovative researchers experts and practitioners organising these innovative discussion forums at the highest level is necessary. Therefore the Department of Islamic Economics Faculty of Economic and Business Universitas Airlangga in collaboration with the Department of Islamic Economics Faculty of Economics and Business Education UPI proudly presents The 4th International Conference on Islamic Economics Business and Philanthropy ICIEBP that was held on 4-5 October 2022 in Surabaya Indonesia. The theme as well as the main objective of the conference is Integration of Islamic Economics Finance and Philanthropy for Sustainable Development of Cities and Communities. This conference program will elaborate on how a nation can achieve sustainable development and at the same time solve socioeconomic problems such as poverty. In addition the Islamic perspective as a new and emergent pattern has demonstrated an unprecedented performance in terms of transforming Muslim societies and beyond. Financial Market Bubbles and Crashes, Second Edition Harold L. Vogel, 2018-08-16 Economists broadly define financial asset price bubbles as episodes in which prices rise with notable rapidity and depart from historically established asset valuation multiples and relationships. Financial economists have for decades attempted to study and interpret bubbles through the prisms of rational expectations efficient markets and equilibrium arbitrage and capital asset pricing models but they have not made much if any progress toward a consistent and reliable theory that explains how and why bubbles and crashes evolve and can also be defined measured and compared. This book develops a new and different approach that is based on the central notion that bubbles and crashes reflect urgent short side rationing which means that as such extreme conditions unfold considerations of quantities owned or not owned begin to displace considerations of price.
