Basic Points about Arguments

Argument Vocabulary

- Argument: a chain or reasoning designed to prove something
 - Consists of one or more premises
 - Has a conclusion
 - Says the conclusion follows from the premises
- Valid: conclusion follows from the premises
- Sound: the argument must be valid AND the premises must be true

Example

- All men are mortal. Socrates is a man. Thus, Socrates is mortal.
- The first two statements are the premises and the third statement is the conclusion (it follows from the premises)

Drawing conclusions

- "Following from the premises" means a logical relationship exists between them
- The conclusion follows from the premises if it is impossible for the premises to be true and the conclusion to be false simultaneously
