Analyses Concerning Passive and Active Synthesis Edmund Husserl, 2001-10-31 These lectures are the first extensive application of Husserl's newly developed genetic phenomenology to perceptual experience to the way in which it is connected to judgments cognition Students of phenomenology will find this work indispensable *Analyses Concerning Passive and Active Synthesis* Edmund Husserl, 2001-10-31 Coming from what is arguably the most productive period of Husserl's life this volume offers the reader a first translation into English of Husserl's renowned lectures on passive synthesis given between 1920 and 1926 These lectures are the first extensive application of Husserl's newly developed genetic phenomenology to perceptual experience and to the way in which it is connected to judgments and cognition They include an historical reflection on the crisis of contemporary thought and human spirit provide an archaeology of experience by questioning back into sedimented layers of meaning and sketch the genealogy of judgment in active synthesis Drawing upon everyday events and personal experiences the Analyses are marked by a patient attention to the subtle emergence of sense in our lives By advancing a phenomenology of association that treats such phenomena as bodily kinaesthesia temporal genesis habit affection attention motivation and the unconscious Husserl explores the cognitive dimensions of the body in its affectively significant surroundings An elaboration of these diverse modes of evidence and their modalizations transcendental aesthetic allows Husserl to trace the origin of truth up to judicative achievements transcendental logic Joined by several of Husserl's essays on static and genetic method the Analyses afford a richness of description unequalled by the majority of Husserl's works available to English readers Students of phenomenology and of Husserl's thought will find this an indispensable work **Analyses Concerning Passive and Active Synthesis** Edmund Husserl, 2014-01-15

Contemporary Kantian Metaphysics R. Baiasu, G. Bird, A. Moore, 2012-02-07 Responding to growing interest in the Kantian tradition and in issues concerning space and time this volume offers an insightful and original contribution to the literature by bringing together analytical and phenomenological approaches in a productive exchange on topical issues such as action perception the body and cognition and its limits [The Intentional Spectrum and Intersubjectivity](#) Michael D. Barber, 2011-05-18 World renowned analytic philosophers John McDowell and Robert Brandom dubbed Pittsburgh Neo Hegelians recently engaged in an intriguing debate about perception In *The Intentional Spectrum and Intersubjectivity* Michael D Barber is the first to bring phenomenology to bear not just on the perspectives of McDowell or Brandom alone but on their intersection He argues that McDowell accounts better for the intelligibility of empirical content by defending holistically functioning reflectively distinguishable sensory and intellectual intentional structures He reconstructs dimensions implicit in the perception debate favoring Brandom on knowledge's intersubjective features that converge with the ethical characteristics of intersubjectivity Emmanuel Levinas illuminates Phenomenology becomes the third partner in this debate between two analytic philosophers critically mediating their discussion by unfolding the systematic interconnection among

Studies in Transcendental Phenomenology V. C. Thomas, 2023-01-31 Known as the founder of the phenomenological movement this book examines Husserl's various phases of phenomenology during his realist transcendental static genetic and post-Crisis of European Sciences periods. Consisting of ten carefully researched and thoroughly examined essays, this book describes Husserl's concepts and ideas through numerous examples and diagrammatic representations in a bid to elucidate the nuances of phenomenology for its readers. Valuable insights into Husserl's realist phase are made in the chapter on Meaning and the chapters on Natural Attitude, Epoch and Phenomenological Reduction, while the chapter on Noesis-Noema symbolizes the transcendental phase. Thomas points out Husserl's transition from static to genetic phenomenology in the chapter on Lived Body, with the chapters on Lifeworld and the Notion of the Other later focusing on this perspective. Husserl's entire phenomenological space, including his pre-phenomenological period, are covered in the chapter on Lived Time. However, the chapters on Phenomenology, The Study of Self and Beyond, and Consciousness and Intentionality are the fulcrums upon which the edifice of phenomenology turns. The final chapter on Presuppositionlessness in phenomenology expresses Thomas's personal enquiries into Husserl's contention that phenomenology is a presuppositionless science. This book will be of particular interest to research scholars and post-graduate students in the areas of Philosophy and Social Sciences, as well as those interested in contemporary Western Philosophy and the history and development of Ideas.
