Anglais Technique Informatique:

The Beginning Translator's Workbook Michele H. Jones, 2014-03-18 This workbook combines methodology and practice for beginning translators with a solid proficiency in French. It assumes a linguistic approach to the problems of translation and addresses common pitfalls including the delineation of translation units, word polysemy, false cognates and structural and cultural obstacles to literal translation. The first part of the book focuses on specific strategies used by professionals to counter these problems including transposition, modulation, equivalence and adaptation. The second part of the book provides a global application of the techniques taught in the opening sections, guiding the student through step by step translations of literary and non literary excerpts. The revised edition clarifies some of the finer points of the translation techniques introduced in the first edition, provides extra practice exercises and offers information on a website that can be used in class.

Attitudes towards English in Europe Andrew Linn, Neil Bermel, Gibson Ferguson, 2015-07-24 The status of English in Europe is changing and this book offers a series of studies of attitudes to English today. Until recently English was often seen as an opportunity for Europeans to take part in the global market but increasingly English is viewed as a threat to the national languages of Europe and the idea that Europeans are equally at home in English is being challenged. This book will appeal to anyone interested in global English.

His research has mainly been devoted to the history of English and it is only natural that the first and longest section should consist of 11 papers on variation in English both diachronic and synchronic. The second, barely shorter with its 9 papers, is devoted to the description of various aspects of modern English; some of these papers shade off into theoretical linguistics. Professor Dekeyser, having obtained his Ph.D. on grammaticography, there is a third section on Grammar from the Past with 5 papers. The final section, 9 papers on Language Teaching and Contrast, honours the eminent teacher of literally thousands of budding anglicists.
