Jones, Robert K. Noyd, Kenneth S. Sagendorf, 2023-07-03 This book leads you through the process of designing a learning centered course It is written as a how to handbook providing step by step guidance on creating a pathway to student learning including 26 workboxes also available free online that lead you through each element of the course design process and promote a rich reflection process akin to being in a workshop setting The authors prompt you to 1 consider the distinctive characteristics of your students 2 clearly articulate your course learning goals 3 create aligned summative assessments 4 identify the specific knowledge skills and attitudes students will need in order to be successful 5 craft effective learning experiences informed by the well documented research on how people learn and 6 incorporate formative assessment to ensure you and your students are staying on track Completion of the sequence of worksheets leads to a poster as a visual display of your course design This graphic depiction of your course ties the components together provides a clear map of action for teaching your course for modifying as you evaluate the success of particular strategies or want to introduce new concepts and for developing your syllabus A rubric for evaluating course posters is included For faculty developers this book provides a proven and ready made resource and text around which to design or redesign learner centered course design workshops or multi day course design retreats replicating or modifying the renowned workshop that the authors have developed at the Air Force Academy for both faculty new to teaching and those with many years of teaching experience under their belt From GCSEs to EBCs Great Britain. Parliament. House of Commons. Education Committee, 2013 The Government's plans for replacing GCSEs with new English Baccalaureate Certificates in some subjects is trying to do too much too fast Introducing several fundamental changes at the same time and to a tight timetable will jeopardise the quality of the reforms and may threaten the stability of the wider exam system GCSEs need significant improvements in order to restore public confidence in the exam system but the Government still needs to make the case that the GCSE brand is so discredited that it is beyond repair MPs are also concerned about the impact of the changes on subjects outside the English Baccalaureate where students will be taking GCSEs for some time to come according to the Government's plans The report also questions how well the Government's proposals will serve lower attaining pupils who are often the most disadvantaged There is no evidence that the proposed changes will help to tackle under achievement or narrow the attainment gap between the richest and poorest students any more effectively than GCSEs The Government is also called upon to re think its plans for a Statement of Achievement specifically for lower attaining pupils MPs agree that changes are needed to the way in which exams are run but they raise serious concerns about franchising subjects to exam boards The report is critical of the Government's decision to abolish some GCSEs before publishing the outcomes of the National Curriculum Review and its proposed changes to the school accountability system MPs also note the wide ranging stakeholder

opposition to many of the Government's proposals

Black Domers Don Wycliff, David Krashna, 2017-08-15 Black Domers tells the compelling story of racial integration at the University of Notre Dame in the post World War II era In a series of seventy five essays beginning with the first African American to graduate from Notre Dame in 1947 to a member of the class of 2017 who also served as student body president we can trace the trials tribulations and triumphs of the African American experience at Notre Dame through seven decades Don Wycliff and David Krashna's book is a revised edition of a 2014 publication With a few exceptions the stories of these graduates are told in their own words in the form of essays on their experiences at Notre Dame The range of these experiences is broad joys and opportunities but also hardships and obstacles are recounted Notable among several themes emerging from these essays is the importance of leadership from the top in successfully bringing African Americans into the student body and enabling them to become fully accepted fully contributing members of the Notre Dame community The late Rev Theodore Hesburgh president of the university from 1952 to 1987 played an indispensable role in this regard and also wrote the foreword to the book This book will be an invaluable resource for Notre Dame graduates especially those belonging to African American and other minority groups specialists in race and diversity in higher education civil rights historians and specialists in race relations

Teaching Undergraduate Science Linda C. Hodges, 2023-07-03 This book is written for all science or engineering faculty who have ever found themselves baffled and frustrated by their undergraduate students lack of engagement and learning The author an experienced scientist faculty member and educational consultant addresses these issues with the knowledge of faculty interests constraints and day to day concerns in mind Drawing from the research on learning she offers faculty new ways to think about the struggles their science students face She then provides a range of evidence based teaching strategies that can make the time faculty spend in the classroom more productive and satisfying Linda Hodges reviews the various learning problems endemic to teaching science explains why they are so common and persistent and presents a digest of key ideas and strategies to address them based on the research she has undertaken into the literature on the cognitive sciences and education Recognizing that faculty have different views about teaching different comfort levels with alternative teaching approaches and are often pressed for time Linda Hodges takes these constraints into account by first offering a framework for thinking purposefully about course design and teaching choices and then providing a range of strategies to address very specific teaching barriers whether it be students motivation

engagement in class ability to problem solve their reading comprehension or laboratory research or writing skills Except for the first and last chapters the other chapters in this book stand on their own i e can be read in any order and address a specific challenge students have in learning and doing science Each chapter summarizes the research explaining why students struggle and concludes by offering several teaching options categorized by how easy or difficult they are to implement Some for example can work in a large lecture class without a great expenditure of time others may require more preparation and a more adventurous approach to teaching Each strategy is accompanied by a table categorizing its likely impact how much time it will take in class or out and how difficult it will be to implement Like scientific research teaching works best when faculty start with a goal in mind plan an approach building on the literature use well tested methodologies and analyze results for future trials Linda Hodges message is that with such intentional thought and a bit of effort faculty can succeed in helping many more students gain exciting new skills and abilities whether those students are potential scientists or physicians or entrepreneurs Her book serves as a mini compendium of current research as well as a protocol manual a readily accessible guide to the literature the best practices known to date and a framework for thinking about teaching
