Biology Of Human Aging 2nd Edition:

Biology of Human Aging Alexander P. Spence, 1989 *The Biology of Human Aging* John K. Hampton, Ruth F. Craven, Margaret M. Heitkemper, 1997 Presenting up to date information about the biology of human ageing this second edition of the text includes background biological material numerous illustrations and end of chapter review questions

Handbook of Theories of Aging, Second Edition Merrill Silverstein PhD, Vern L. Bengtson PhD, Norella Putney PhD, Daphna Gans PhD, 2008-10-27 The field of gerontology has often been criticized for being data rich but theory poor The editors of this book address this issue by stressing the importance of theory in gerontology While the previous edition focused on multidisciplinary approaches to aging theory this new edition provides cross disciplinary integrative explanations of aging theory The contributors of this text have reached beyond traditional disciplinary boundaries to partner with researchers in adjacent fields in studying aging and age related phenomena This edition of the Handbook consists of 39 chapters written by 67 internationally recognized experts in the field of aging It is organized in seven sections reflecting the major theoretical developments in gerontology over the past 10 years Special Features Comprehensive coverage of aging theory focusing on the biological psychological and social aspects of aging A section dedicated to discussing how aging theory informs public policy A concluding chapter summarizing the major themes of aging and offering predictions about the future of theory development Required reading for graduate students and post doctoral fellows this textbook represents the current status of theoretical development in the study of aging **Human Development in Adulthood** Lewis R.

Aiken, 2005-12-21 Human Development in Adulthood is a comprehensive multidisciplinary overview of adult development in a number of areas both personal and societal from mental and physical health to economic and social conditions Variables including race gender economic status and political and religious affiliation are considered in the discussion of such human issues as love and marital relations economic concerns including employment and living conditions violence in its various forms including crime and war aging and death The numerous illustrations chapter summaries and glossary will prove especially useful to students Textbook of Men's Health and Aging, Second Edition Bruno Lunenfeld, Louis J. G.

Gooren, Alvaro Morales, John Morley, 2007-12-20 The first edition of Textbook of Men's Health did much to establish and define the scope of the emerging subspecialty of aging men's health This revised and updated edition with new sections on basic sciences and sexual dysfunction has a small but significant change of approach reflected in the new title The central mission of the new edition *Health Aspects of Aging* Gari Lesnoff-Caravaglia, 2007 This second edition of Health Aspects of Aging serves to broaden the perspectives of societal change due to increases in life expectancy as well as the effects of age related changes as they impinge upon the provision of health care for older persons The growing presence of a large number of persons aged 65 and older worldwide has propelled a re evaluation of the nature of life that is protracted to 100 years and beyond The emphasis in this second edition is to replace the prevailing problem approach to aging by a problem solving

approach The problem solving approach of this volume has allowed for the incorporation of the concept of new social structures and the development of intervention and prevention strategies along with new technologies Such new products and health care measures include those that are deliberately aimed to offset debilities due to normal age changes the onslaught of diseases incongruous environments and altered social states Such a multi disciplinary perspective underscores the fact that aging permeates not only biological systems but clinical medicine economics ethics and the very fabric of society The chapters in this volume address these issues from the standpoints of diverse disciplines and professional positions Since biological changes are primary issues the aging process is largely described from the perspective of biological changes related to age and to particular dysfunctions The environmental features and the potential introduction of technological interventions are interspersed within chapters as well as finding primary focus in particular chapters The maturity of the technology described in the chapters varies from devices and systems that are nearly ready to be marketed to concepts and prototypes that are still in the design and developmental stages in the laboratory The relationship between the provision of appropriate health care and the responsible utilization of technologies as described in this volume will serve to enhance the nature of life extension

Human Aging Paul W. Foos, M. Cherie Clark, 2016-01-08 This text offers a readable and friendly presentation of the important methods findings and theories of human aging while actively involving the reader in meaningful exercises and critical thinking Students are repeatedly challenged to apply information in the text to the older adults in their own lives Specifically suggestions for enhancing the lives of their older relatives are offered and encouraged These include guidelines for discussions they might have regarding social emotional and environmental changes as well encouraging intellectual and social interaction In this Edition Emphasis on the science of the study of aging and why questions in aging are difficult to answer how social scientists attempt to handle such difficulties and the successes and failures social scientists have had thus far in answering those questions The text also demonstrates how current research findings are now being applied in the real world and or how they might be applied in the future Cross cultural comparisons and ethnic group comparisons are included wherever possible Each chapter begins with Senior View which introduces students to a real person and gives them a chance to hear what older adults think and say about important issues related to the chapter and a chance to compare those opinions to the research findings Each chapter ends with Making Choices emphasizing the important behavioral emotional and social choices that students can make now to prolong a healthy happy life Chapter Projects offer the opportunity for active learning as students investigate for themselves an issue related to the chapter Instructors can expand these projects for students who want to learn more or for independent study Focus on Aging boxes compliment the material in the text providing additional insight and examples and encouraging critical thinking Every chapter includes discussion questions study questions chapter exercises and related online resources
