Quick Reference Handbook for Surgical Pathologists Natasha Rekhtman, MD, PhD, Marina K Baine, MD, PhD, Justin A. Bishop, MD, 2019-05-07 This book contains a compilation of high yield at a glance summaries in quick reference format for various topics that are frequently encountered by pathologists in the daily practice or on the boards The focus is not organ based histologic criteria but rather everything else that goes into pathologic diagnoses but is difficult to keep committed to memory The emphasis is on immunohistochemistry special stains grading systems molecular markers tumor syndromes and helpful clinical references Also included are morphologic summaries that encompass high yield material cutting across all organ systems such as an illustrated guide for microorganisms tumor differentials and an illustrated glossary of pathologic descriptors The book has a unique format in that the information is presented primarily in tables and diagrams accompanied by brief and to the point explanatory text The guiding principle was to boil the information down to the essentials but with just enough commentary to

be accessible to a newcomer to pathology and to serve as a quick reference to a practicing pathologist In the 7 years since its initial publication there have been considerable advances in surgical pathology particularly immunohistochemical stains molecular diagnostics and histologic grading schemes In the second edition the content has been thoroughly updated to incorporate these developments while retaining the overall scope and concise format of the first edition In addition the reader will find summaries for many new topics as well as multiple new cartoon illustrations and diagrams

The Gleason Grading System Epstein, 2013 The Gleason system is the most important prognostic marker of prostate cancer that is critical to patient management and drives therapies across all disciplines dealing with prostate cancer In addition to an extensive number of photographs this book discusses in detail clinically related issues that are crucial for the urologist radiotherapist and oncologists to know such as predicting upgrading and downgrading from needle biopsy to radical prostatectomy risk of Gleason grading change over time significance of tertiary grade patterns and prognosis and implications related to various Gleason scores and different therapies Images that were particularly difficult for contributing pathologists sent in for consultation are used in addition to classic examples as these cases are the most informative in showing the difficulties with Gleason grading
