Organized alphabetically as a lexicon *Keywords* explores the history and common usage of major terms in the everyday language of capitalism Because these words have infiltrated everyday life their meanings may seem self evident even benign Who could be against empowerment after all *Keywords* uncovers the histories of words like innovation which was once synonymous with false prophecy before it became the prevailing faith of Silicon Valley Other words like best practices and human capital are relatively new coinages that subtly shape our way of thinking As this book makes clear the new language of capitalism burnishes hierarchy competition and exploitation as leadership collaboration and sharing modeling for us the habits of the economically successful person be visionary be self reliant and never ever stop working
