Angels Of Death Exploring The Euthanasia Underground:

Angels of Death Roger S. Magnusson,2002 **Angels of Death** Roger S. Magnusson,2013-05-09 Public discussion of euthanasia and assisted suicide is growing In Australia as elsewhere the debate is difficult contentious and confronting and hampered by the secrecy that necessarily surrounds illegal practice Most people simply have no way of knowing how and how often medically assisted death actually occurs Roger Magnusson presents for the first time detailed first hand accounts by doctors nurses therapists and other health professionals who have been participants in assisted death All have been intimately involved in caring for people with AIDS both in Australia and in California He places these ambivalent self incriminating accounts within the broader context of the right to die debate and the challenges of palliative care The frankness of the health workers and the richness of their collected evidence set this book apart From within a culture of deception they speak knowingly and movingly of the merciful release of a peaceful death while acknowledging the reality of botched attempts euthanasia without consent precipitative euthanasia lack of accountability and professional distance and many other disturbing issues Angels of Death provides a window into the euthanasia underground a secret part of medicine and nursing that few professionals will publicly acknowledge It brings a sense of urgency and precision to public debate and equips us all to think more independently about these crucial issues Angels of Death Roger S. Magnusson,2002-02-15

Medical Law Emily Jackson,2019 Providing a clear and accessible guide to medical law this work contains extracts from a wide variety of academic materials so that students can acquire a good understanding of a range of different perspectives

Making Sense of Dying and Death Andrew Fagan,2004 Health illness and disease are topics well suited to interdisciplinary inquiry This book brings together scholars from around the world who share an interest in and a commitment to bridging the traditional boundaries of inquiry We hope that this book begins new conversations that will situate health in broader socio cultural contexts and establish connections between health illness and disease and other socio political issues This book is the outcome of the first global conference on Making Sense of Health Illness and Disease held at St Catherine s College Oxford in June 2002 The selected papers pursue a range of topics from the cultural significance of narratives of health illness and disease to healing practices in contemporary society as well as patients illness experiences

Dealing with Death Michael Green,Jennifer Green,2006-05-25 Dealing with Death is a comprehensive and authoritative source of information for professionals on the procedures laws and cultural customs that should be observed when someone dies This completely updated and expanded second edition takes into account changes in UK law and the impact of the Harold Shipman and Alder Hey enquiries *The Good Euthanasia Guide* Derek Humphry,2005 The Good Euthanasia Guide is a where to and why book which complements the how to of Final Exit It contains an annotated list of every right to die group in the world and a unique account of the assisted suicide laws in almost every country a filmography and a bibliography Dr Jack Kevorkian s life and work are reported in three chapters Debating Euthanasia Emily Jackson,John

Keown,2011-12-02 In this new addition to the Debating Law series Emily Jackson and John Keown re examine the legal and ethical aspects of the euthanasia debate Emily Jackson argues that we owe it to everyone in society to do all that we can to ensure that they experience a good death For a small minority of patients who experience intolerable and unrelievable suffering this may mean helping them to have an assisted death In a liberal society where people s moral views differ we should not force individuals to experience deaths they find intolerable This is not an argument in favour of dying On the contrary Jackson argues that legalisation could extend and enhance the lives of people whose present fear of the dying process causes them overwhelming distress John Keown argues that voluntary euthanasia and physician assisted suicide are gravely unethical and he defends their continued prohibition by law He analyses the main arguments for relaxation of the law including those which invoke the experience of jurisdictions which permit these practices and finds them wanting Relaxing the law would he concludes be both wrong in principle and dangerous in practice not least for the dying the disabled and the disadvantaged

Assisted Death in Europe and America Guenter Lewy,2011 Advances in medical treatment now enable physicians to prolong life to a previously unknown extent however in many instances these new techniques mean not the saving of life but prolonging the act of dying In the eyes of many medical technology has run out of control and contributes to unnecessary suffering Hence the demand has arisen that patients should be entitled to choose death when pain and physical and mental deterioration have destroyed the possibility of a dignified and meaningful life and that their doctors should help them to realize this endeavor At the present time there are seven jurisdictions in the world that with various restrictions have legalized the practice of assisted death physician assisted suicide and or voluntary euthanasia to wit the Netherlands Belgium Luxembourg Switzerland in Europe and the states of Oregon Washington and Montana in the United States Four of these regimes in the Netherlands Belgium Switzerland and the state of Oregon have been functioning for many years and we have for them a substantial body of data as well as much observational research This book is based upon this material The literature dealing with the moral legal and social aspects of assisted death is voluminous but there is a paucity of writing that provides a detailed account of the way these four regimes are actually working Many partisans on both sides of the issue cite existing data selectively or at times willfully distort the empirical evidence in order to strengthen their case Based on the documentary record and interviews with officials and scholars this book seeks to give the specialist as well as the general interested reader a reliable picture of the way assisted death functions and to draw relevant lessons While accurate factual information cannot settle a moral debate it nevertheless is a precondition of any well founded argument The author speaks authoritatively about the issues he addresses I think this book does make an important contribution to the field It will be of interest to students and scholars of PAS as a source of information and reference I definitely recommend publication Stuart Youngner Department of Bioethics Case Western Reserve University School of Medicine The information collected here makes an important contribution to the literature on PAS because it collects a broad array of relevant information into a

single volume It is interesting and enlightening This will make the book a valuable resource for anyone interested in the subject and an especially useful resource for academics who study or teach about the issues Rosamond Rhodes Director Bioethics Education Mt Sinai School of Medicine **Assisted Dying for the Terminally Ill Bill (HL)** Great Britain: Parliament: House of Lords: Select Committee on the Assisted Dying for the Terminally Ill Bill,2005-04-28 The Bill was published as HLB 4 session 2004 05 ISBN 01084188390 This volume contains a selection of the 14 000 personal letters and other submissions received by the Committee with regards to their inquiry into the Bill
