Bnf Manual 2013:

Assessing and Managing the Acutely Ill Patient for Nursing Associates Cariona Flaherty, Marion Taylor, 2022-11-26
Acutely ill adults present in a variety of settings and caring for them is a key part of the nursing associate role. This book equips you with the skills and knowledge to assess the acutely ill adult and manage their care. Each chapter follows a case study of a patient presenting with an acute illness, working step by step through their assessment and care whilst drawing on relevant pathophysiology, pharmacology and evidence-based practice. Written in clear language specifically for the nursing associate, this is your perfect introduction to the world of acute care. Key features: Fully mapped to the NMC Standards of Proficiency for Nursing Associates 2018. Introduces a range of commonly encountered acute illnesses across different body systems. A unique case study approach uses real-world practice scenarios to make understanding the complex theory of pathophysiology and pharmacology much easier. Focuses specifically on the requirements of the nursing associate role, helping you to develop into a confident professional practitioner. Clinical Topics in Child and Adolescent Psychiatry Sarah Huline-Dickens, 2014-03-03. However, much policy material is produced; the real function of most child psychiatrists is to assess and treat mental disorders in childhood and adolescence. This is a comprehensive update on the field that will inform the clinical practice of all child and adolescent mental health professionals. The authors bring the medical perspective to bear on psychopathology and demonstrate that our understanding of childhood psychiatric disorders, their origins and their treatments, are improving. They write with a particular focus on four contemporary themes: continuity into adult life, the integration of biological and social aetiology, the influence of neuroscience, and the increasing use of research and evidence, and take into account recent changes in DSM 5. Some chapters have been specially commissioned for this book, while previous versions of the others have been published in the journal *Advances in Psychiatric Treatment* and have now been fully revised and updated in line with the four themes. The new chapters include disorders in 0 to 4 year olds, Tourette syndrome, and the clinically significant topic of anxiety. Other topics include autism spectrum disorders, behavioural and affective disorders, pharmacology and psychological therapies, fabrication and induction of illness, and gender dysphoria. All the topics covered are central to the work of practising child and adolescent mental health professionals, and many will also be relevant to paediatricians, psychologists, social workers, and trainees in all these fields. *Children and Young People's Mental Health* Tim McDougall, 2016-10-04. *Children and Young People's Mental Health* equips nurses and healthcare professionals with the essential skills and competencies needed to deliver effective assessment, treatment, and support to children and young people with mental health problems and disorders, and their families. Drawing on McDougall's *Child and Adolescent Mental Health Nursing* and taking the Cavendish Report and Willis Commission into account, this new textbook has been designed to ensure those working in CAMHS can continue to provide a high-quality, evidence-based service. The book explores best practice in a variety of settings and addresses issues such as eating disorders, self-harm, ADHD, forensic

mental health issues and misuse of drugs and alcohol in children and young people as well as child protection clinical governance safeguarding and legal requirements Furthermore with young people contributing directly to several chapters the book reflects the importance of involving them in planning delivering and evaluating CAMHS services It is essential reading for all health and social care professionals and students working with children and young people particularly those working in specialist child and adolescent mental health settings
