

**Problem 4.23**

$$3 - 5 - (-8) + 6 - 20$$

We will work left to right and perform only one operation at a time.

|                                             |                                                                                                                                   |
|---------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| <u><math>3 - 5</math></u> $- (-8) + 6 - 20$ | We start with the first computation on the left. While you may not explicitly write this, recall that<br>$3 - 5 = 3 + (-5)$       |
| $-2 - (-8) + 6 - 20$                        | We replace the underlined part with the result of the computation, and carefully bring everything else down.                      |
| <u><math>-2 - (-8)</math></u> $+ 6 - 20$    | In this case, you would be well advised to make the substitution of subtraction for addition, before performing any computations. |
| <u><math>-2 + (+8)</math></u> $+ 6 - 20$    | We did not perform any calculations, but we rewrote the expression to make it easier to complete the problem correctly.           |
| $6 + 6 - 20$                                | We performed the calculation and brought everything else down.                                                                    |
| <u><math>6 + 6</math></u> $- 20$            | We now work left to right and perform the next operation.                                                                         |
| $12 - 20$                                   | We replace the underlined part with the result of the computation, and carefully bring everything else down.                      |
| <u><math>12 - 20</math></u>                 | There is only one computation left. Again, you may not explicitly write this, but recall that<br>$12 - 20 = 12 + (-20)$           |
| $-8$                                        | This is the answer.                                                                                                               |

## **Algebra 2 Guided Problem Solving Answers:**

Algebra 2 Guided Problem Solving Answers: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the engaging narratives that have captivated audiences this year. Algebra 2 Guided Problem Solving Answers : Colleen Hoover "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Algebra 2 Guided Problem Solving Answers : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Algebra 2 Guided Problem Solving Answers : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Pape, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
