Australias Trade Investment And Security In The Asian Century:

Australia's Trade, Investment And Security In The Asian Century John Hynes Farrar, Mary Hiscock, Vai Io Lo, 2015-06-22 Given its geographical proximity to Asia and its close alliance with the West Australia amid the rise of Asian economies needs to re formulate its policies on trade investment and security Over the years in making decisions on issues relating to trade investment and security the Australian government has often resorted to the notion of national interest This book attempts to analyse national interest from the perspectives of economics finance international trade foreign direct investment international relations energy resources and migration in the context of Australia in the Asian century Currently there are no multidisciplinary books on the Australian national interest This book fills the gap with a broad and integrated approach in examining the subject Academics researchers and students of various disciplines such as economics finance international relations international trade foreign direct investment and Asian studies policy advisors government agencies financial institutions and trade law practitioners from around the world will find this book useful and stimulating [The China-Australia Free Trade Agreement](#) Colin Picker, Heng Wang, Weihuan Zhou, 2017-12-14 This book provides readers with a unique opportunity to learn about one of the new regional trade agreements RTAs the China Australia Free Trade Agreement ChAFTA that has been operational since December 2015 and is now at the forefront of the field This new agreement reflects many of the modern and up to date approaches within the international economic legal order that must now exist within a very different environment than that of the late eighties and early nineties when the World Trade Organization WTO was created The book therefore explores many new features that were not present when the WTO or early RTAs were negotiated It provides insights and lessons about new and important trade issues for the twenty first century such as the latest approaches to the regulation of investment twenty first century services and the emerging digital knowledge economy In addition this book provides new understandings of the latest RTA approaches of China and Australia The book s contributors all foremost experts on their subject matter within this field explore the inclusion of many traditional trade and investment agreement features in the ChAFTA showing their continuing relevance in modern contexts *Globalisation in Transition* Umair Ghor, Mary Hiscock, Louise Parsons, Casey Watters, 2023-07-01 This book brings together diverse ideas on selected facets of globalisation and transitions in globalisation The scholars that have contributed to this book examine the phenomenon of globalisation through varied lenses focusing specifically on the human and economic perspectives These analyses originate in many areas and different legal systems but are all connected through the work of Professor John Farrar and the associations of the contributors with him This book does not attempt to provide answers to the many challenges of globalisation Instead this book discusses selected particular aspects of globalisation that derive from and are connected to the authors own research The thematic diversity of this book is a true strength and should draw a broad range of readers Whilst this book is primarily written from a legal angle its content overlaps with broader specialised policy areas with

contributions ranging from taxation to ageing from insolvency to social licences and from refugees to the treatment of first nations people In short there is something for everyone in this book As a tribute to the life s work of an outstanding legal scholar Professor John Farrar this book explores legal responses to the social and economic impacts of globalisation After personal acknowledgments from colleagues highlighting the significance of his scholarship this book is divided into two parts The first part addresses the social impact of globalisation focusing on immigration and the impact on First Nations people Changes in the regulation of medicine and technologies related to ageing are also addressed in this part In part two the book addresses the transitioning corporate law landscape and notions of fairness and good faith in the law The final part contains the conclusions reflections and synthesis of the editors

Legal Thoughts between the East and the West in the Multilevel Legal Order Chang-fa Lo,Nigel N.T. Li,Tsai-yu Lin,2016-11-11 This book focuses on the interaction and mutual influences between the East and the West in terms of their legal systems and practices In this regard it highlights Professor Herbert H P Ma s achievements and his efforts to bring Eastern and Western legal concepts and systems closer together The book shows that while there have been convergences between different legal regimes in many fields of law diverse legal practices and approaches rooted in differing cultural social political and philosophical backgrounds do remain and that these differences are not necessarily negative elements in the contemporary legal order By examining different levels of the legal order including domestic regional and multilateral it goes on to argue that identifying these diversities and addressing the interactions and mutual influences between different regimes is a worthwhile undertaking not only in terms of mutual enrichment but also with regard to intensifying the degree of desirable coordination between different legal systems All chapters were written by leading experts practitioners and scholars from different jurisdictions with expertise in various fields of law and different levels of the legal order and discuss a number of issues with particular focus on either one way or mutual influences between the Eastern and the Western legal systems practices and philosophies

The Social Sciences in the Asian Century Carol Johnson,Vera Mackie,Tessa Morris-Suzuki,2015-09-30 In this collection of essays we reflect on what it means to practise the social sciences in the twenty first century The book brings together leading social scientists from the Asia Pacific region We argue for the benefit of dialogue between the diverse theories and methods of social sciences in the region the role of the social sciences in addressing real world problems the need to transcend national boundaries in addressing regional problems and the challenges for an increasingly globalised higher education sector in the twenty first century The chapters are a combination of theoretical reflections and locally focused case studies of processes that are embedded in global dynamics and the changing geopolitics of knowledge In an increasingly connected world these reflections will be of global relevance

Fairness, opportunity and security Michael Keating,John Menadue,2015-10-30 The Australian government s policy to turn back the boats and condemn asylum seekers to indefinite detention is an open and weeping sore Government standing is undermined Australia is condemned internationally Over and over Tony Abbott

proclaims that the only measure of accountability is that the boats have been stopped even when the price is physical and sexual abuse profound psychological damage and death in detention centres And on the sea return to the dangers that so many have risked everything to escape How do we stand by and allow this to happen Why aren't we all marching in the streets How has the government so skewed the argument that the most needy courageous and desperate people have become demonised

Security Strategies of Middle Powers in the Asia Pacific Ralf Emmers, Sarah Teo, 2018-02-05 Security Strategies of Middle Powers in the Asia Pacific examines what drives the different regional security strategies of four middle powers in the Asia Pacific Australia Indonesia South Korea and Malaysia Drawing on the extant middle power literature the authors argue that the regional security strategies of middle powers could take two forms namely functional or normative A functional strategy means that the middle power targets its resources to address a specific problem that it has a high level of interest in while a normative strategy refers to a focus on promoting general behavioural standards and confidence building at the multilateral level This book argues that whether a middle power ultimately employs a more functional or normative regional security strategy depends on its resource availability and strategic environment
