Authoritarian Origins of Democratic Party Systems in Africa Rachel Beatty Riedl, 2014 This book investigates why seemingly similar African countries developed very different forms of democratic party systems Authoritarian Origins of Democratic Party Systems in Africa Rachel Beatty Riedl, 2014-02-13 Why have seemingly similar African countries developed very different forms of democratic party systems Despite virtually ubiquitous conditions that are assumed to be challenging to democracy low levels of economic development high ethnic heterogeneity and weak state capacity nearly two dozen African countries have maintained democratic competition since the early 1990s Yet the forms of party system competition vary greatly from highly stable nationally organized well institutionalized party systems to incredibly volatile particularistic parties in systems with low institutionalization To explain their divergent development Rachel Beatty Riedl points to earlier authoritarian strategies to consolidate support and maintain power The initial stages of democratic opening provide an opportunity for authoritarian incumbents to attempt to shape the rules of the new multiparty system in their own interests but their power to do so depends on the extent of local support built up over time **Party Systems and Democracy in Africa** R. Doorenspleet, L. Nijzink, 2014-12-02 Do party systems help or hinder democracy in Africa Drawing lessons from different types of party systems in six African countries this volume shows that party systems affect democracy in Africa in ways that are unexpectedly different from the relation between party systems and democracy observed elsewhere

Authoritarianism and the Elite Origins of Democracy Michael Albertus, Victor Menaldo, 2018-02 Provides an innovative theory of regime transitions and outcomes and tests it using extensive evidence between 1800 and today

Conservative Party-building in Latin America James Loxton, 2021 Voice and Inequality is about conservative parties in Latin America James Loxton examines parties formed between 1978 and 2010 and tries to understand why some were more successful than others The main puzzle is the surprising connection between roots in dictatorship and success under democracy What allowed authoritarian successor parties in countries like Chile and El Salvador to succeed while those with more democratic origins in countries like Argentina and Guatemala failed It argues that this was not a coincidence the former inherited valuable resources from the old regime that helped them to thrive in the new *Political Parties in the Arab World* Francesco Cavatorta, 2018-06-30 Examines and critiques Derrida's work in relation to gender sexuality and film

Routledge Handbook of Comparative Political Institutions Jennifer Gandhi, Rubén Ruiz-Rufino, 2015-04-10 The Routledge Handbook of Comparative Political Institutions HCPI is designed to serve as a comprehensive reference guide to our accumulated knowledge and the cutting edge of scholarship about political institutions in the comparative context It differs from existing handbooks in that it focuses squarely on institutions but also discusses how they intersect with the study of mass behaviour and explain important outcomes drawing on the perspective of comparative politics The Handbook is organized into three sections The first section consisting of six chapters is organized around broad theoretical and empirical

challenges affecting the study of institutions It highlights the major issues that emerge among scholars defining measuring and analyzing institutions The second section includes fifteen chapters each of which handles a different substantive institution of importance in comparative politics This section covers traditional topics such as electoral rules and federalism as well as less conventional but equally important areas including authoritarian institutions labor market institutions and the military Each chapter not only provides a summary of our current state of knowledge on the topic but also advances claims that emphasise the research frontier on the topic and that should encourage greater investigation The final section encompassing seven chapters examines the relationship between institutions and a variety of important outcomes such as political violence economic performance and voting behavior The idea is to consider what features of the political sociological and economic world we understand better because of the scholarly attention to institutions Featuring contributions from leading researchers in the field from the US UK Europe and elsewhere this Handbook will be of great interest to all students and scholars of political institutions political behaviour and comparative politics Jennifer Gandhi is Associate Professor Department of Political Science Emory University Rub n Ruiz Rufino is Lecturer in International Politics Department of Political Economy King s College London

Violence and Candidate Nomination in Africa Merete Bech Seeberg, Michael Wahman, Svend-Erik Skaaning, 2020-06-04 This comprehensive volume brings together a diverse set of scholars to analyse candidate nomination intra party democracy and election violence in Africa Through a combination of comparative studies and country specific case studies spanning much of Sub Saharan Africa including Kenya Zambia and South Africa the authors shed light on violence during candidate nomination processes within political parties The book covers several cases that vary significantly in terms of democracy party dominance and competitiveness and the institutionalization and inclusiveness of candidate selection processes The authors investigate how common violence is during candidate nomination processes whether the drivers of nomination violence are identical to those of general election violence whether nomination violence can be avoided in high risk cases such as dominant party regimes with fierce intra party competition for power and which subnational locations are most likely to experience nomination violence Through its focus on violence in nomination processes this book firmly places the role of political parties at the centre of the analysis of African election violence While adding to our theoretical and empirical understanding of nomination

violence the book contributes to the literature on conflict the literature on democratization and democratic consolidation and the literature on African political parties This book was originally published as a special issue of the journal Democratization

The Quality of Democracy in Africa Jonathan van Eerd, 2017-04-07 This book shows that democratization in sub Saharan Africa can be successful even if the government remains dominated by one major political party If an institutionalized and strong opposition party even when too weak to take power challenges the dominant government party the quality of democracy improves substantially The comparative study demonstrates that competitive opposition parties in dominant party systems are rooted in the historical legacy of political cleavages related to de colonization that precede the third wave of democratization of the 1990s and have survived the instability of post independence political developments to the present day The study covers 19 African countries and 55 elections overall including four in depth case studies of Botswana Lesotho Ghana and Mali It offers scholars and practitioners of electoral democracies and competitive authoritarian regimes a novel view on the role of party systems in processes of democratization It makes an important contribution to the general literature on state building intertwined with democratization and representation in old and new democracies
