Belarus Background And Us Policy Concerns:

Belarus Steven Woehrel, 2011-05 Belarusian Pres Aleksandr Lukashenko snuffed out Belarus's modest progress toward democracy and a free market economy in the early 1990s and created an authoritarian Soviet style regime Belarus has close historical and cultural ties to Russia Current Russian policy toward Belarus appears to be focused on gaining control of Belarus's economic assets while reducing the costs of subsidizing the Belarusian economy For many years the U S limited ties to the regime while providing modest support to pro democracy org in Belarus Contents of this report Intro Political and Economic Situation Relations with Russia NATO the European Union and Belarus U S Policy This is a print on demand edition of an important hard to find publication Belarus Steven J. Woehrel, 2012 This report provides an overview of the history of U S A Belarus relations The report discusses the political and economic situation in Belarus the relations with Russia European Union and NATO **Belarus** Library of Congress. Congressional Research Service, 2006 Outlines political and economic situation in Belarus following 1994 election of President Aleksandr Lukashenko in light of failures in democratic development and human rights Reviews Belarus relations with Russia NATO and the European Union and summarizes Congressional action and policy options to promote democracy in Belarus Neighbourhood Policy and the Construction of the European External Borders Filippo Celata, Raffaella Coletti, 2015-06-11 This book looks both backward and forward with regard to the European Union's political strategies towards its neighbouring countries By bringing together the perspectives of critical geopolitics policy studies and border studies it presents a comprehensive review of the European Neighbourhood Policy and how it impacts the ongoing construction of the EU's external frontiers Is the EU committed to promoting integration in a wider European space or is a fortress Europe emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders The book aims to problematize this question by showing how the EU's external policies are based on a mixture of openness and closure inclusion and exclusion cooperation and securitisation The European Neighbourhood Policy is a controversial strategy where regionalization and bordering homogenisations and differentiations centrifugal and centripetal forces proceed side by side in an explicit attempt to construct a selective mobile and fragmented border A specific focus is devoted to the diversity of geo strategies the EU is pursuing in its neighbouring countries and regions macro regional strategies and cross border cooperation initiatives as new scales of cooperation and the role of other global players NATO's Democratic Retrenchment Henrik B.L. Larsen, 2019-07-02 Exploring NATO's post Cold War determination to support democracy abroad this book addresses the alliance's adaptation to the new illiberal backlashes in Eastern Europe the Western Balkans and Afghanistan after the alleged return of history The book engages the question of what has driven NATO to pursue democratisation in face of the significant region specific challenges and what can explain policy expansion or retrenchment over time Explaining NATO's adaptation from the perspective of power dynamics that push for international change and historical experience that informs grand strategy allows wider inferences

not only about democratisation as a foreign policy strategy but also about the nature of the transatlantic alliance and its relations with a mostly illiberal environment Larsen offers a theoretical conception of NATO as a patchwork of one hegemonic and several great power interests that converge or diverge in the formulation of common policy as opposed to NATO as a community of universal values This volume will appeal to researchers of transatlantic relations NATO's functional and geographical expansion hegemony and great power politics democracy promotion lessons of the past Neoclassical Realism alliance theory and the crisis of the liberal world order

The Despot's Accomplice Brian Klaas, 2018-05-01 For the first time since the end of the Cold War the world is steadily becoming less democratic The true culprits are dictators and counterfeit democrats But argues Klaas the West is also an accomplice inadvertently assaulting pro democracy forces abroad as governments in Washington London and Brussels chase pyrrhic short term economic and security victories Friendly fire from Western democracies against democracy abroad is too high a price to pay for a myopic foreign policy that is ultimately making the world less prosperous stable and democratic The Despot's Accomplice draws on years of extensive interviews on the frontlines of the global struggle for democracy from a poetry reading politician kidnapping general in Madagascar to Islamist torture victims in Tunisia Belarusian opposition activists tailed by the KGB West African rebels and tea sipping members of the Thai junta Cumulatively their stories weave together a tale of a broken system at the root of democracy's global retreat

Managing Security Threats along the EU's Eastern Flanks Rick Fawn, 2019-10-30 The book addresses security threats and challenges to the European Union emanating from its eastern neighbourhood The volume includes the expertise of policy and scholarly contributors coming from North America Russia and Central Asia and from across the EU Themes and issues include the EU's capacities and actors support from the United States challenges from Russia and a range of case studies including Ukraine other post Soviet conflicts the Kurdish question Central Asia and terrorism and counter terrorism Authors identify current threats and place these challenges into necessary historical context They offer long term recommendations for actionable goals to achieve greater stability in this complex and volatile region This work is explanatory and long lasting and will engage readers in the limits and possibilities of the EU in a challenging era and in its most vital and demanding geographic arena

Russia, EU and the Post-Soviet Democratic Failure Bidzina Lebanidze, 2019-05-22 By studying the influence of the two main external actors in post Soviet space the EU and Russia this study contributes to the increasing body of literature that studies the causes of democratic recession and authoritarian backlash in post Soviet states and the role of regional actors in these processes Empirically the study finds the EU to be both a democracy promoting and democracy hindering actor in post Soviet states Russia's impact on the other hand is far more negative than the literature on democratization and autocracy promotion typically suggests It negatively affects both the quality of democracy of post Soviet states and limits the EU's options for promoting democracy in its neighborhood

Bandwagoning in International Relations: China, Russia, and Their Neighbors Dylan Motin, 2024-04-02 Whether

states balance against or bandwagon with threatening great powers remains an unsolved problem for international relations theory One school argues that military power compels minor powers to accommodate threats while another defends that it elicits balancing instead With the emergence of potential hegemonies in both Asia and Europe namely China and Russia understanding state alignment is more urgent than ever This book shows that bandwagoning has been a rare choice in contemporary Asia and Europe The only states that chose bandwagoning with China or Russia faced both conflicts with third rivals and low levels of U S assistance Going further I divide bandwagoning between full alignment survival accommodation and profit accommodation Bandwagoners choose among these three options based on the severity of the threat posed by the potential hegemon the intensity of third conflicts and the level of U S assistance I test this novel theory against three European Armenia Belarus and Serbia and four Asian Cambodia Myanmar North Korea and Pakistan cases This study is the first to provide an exhaustive and compelling explanation of bandwagoning fully compatible with neorealism and adds to the balancing bandwagoning debate Beyond scholarly implications this research's findings offer advice for policymakers concerned with the changing balance of power in Asia and Europe and how to counter China and Russia's influence

Promoting Democracy and the Rule of Law A. Magen, T. Risse, M. McFaul, 2009-07-31 European and American experts systematically compare U S and EU strategies to promote democracy around the world from the Middle East and the Mediterranean to Latin America the former Soviet bloc and Southeast Asia In doing so the authors debunk the pernicious myth that there exists a transatlantic divide over democracy promotion
