Hardware requirements, minimum/recommended:

Physical RAM memory: 2 GB / 3 GB
Free hard disk space: 2 GB / 4 GB
Processor: 1.0 GHz / 2.2 GHz

Windows compatible pointer (e.g. mouse)

How to install PCM500 Ver. 2.6

a) CD installation:

Insert the installation CD into the CD-drive. If the setup doesn't start automatically, execute setup.exe in the root folder of the installation CD.

b) Downloaded from ABB Software Library:

After free registration, you will get an email with a link to download the executable installation. Start the installation and follow the instructions.

After the installation starts, select the needed software components and follow the instructions to complete the installation.

PCM500 requires Microsoft SQL Server 2008 Express edition. The correct SQL Server instance will be installed automatically. If the correct SQL Server instance is already installed, the PCM500 installation will skip this step. The SQL Server requires Windows Installer 4.5 and .NET

Framework 3.5 SP1, which will also be installed (on Windows XP/Server 2003/ Vista). Windows Installer 4.5 requires a reboot.

When installing PCM500 on Windows 8 or 8.1, a network connection is mandatory. The reason for this is that .NET Framework 3.5 SP1 is only available from Windows Update in Windows 8 and 8.1.

Installing a Windows language pack in Windows 8 or 8.1 before installing the .NET Framework 3.5 will cause the .NET Framework 3.5 installation to fail. Install the .NET Framework 3.5 before installing any Windows language packs.

Installation requires administrator rights. In all versions of Windows it might be necessary to switch off or configure antivirus software to not block the installation and operation of PCM500 (e.g. McAfee Host Intrusion Prevention).

Prerequisites for using PCM500 Ver. 2.6

To operate with PCM500, there must be at least one IEC 61850 Connectivity Package installed and selected to be used with PCM500 Ver. 2.6.

License

There is no license required for PCM500 Ver. 2.6.
