- **Explain biology as a process of scientific discovery**
 - What is the study of life? What is pseudoscience? Describe some examples of each.
 - **Biology is the study of life**
 - **Pseudoscience is a collection of beliefs or practices mistakenly regarded as being based on scientific method.** Ex: religion
- **Determine the levels of organization of matter**
 - What are each of the levels of organization? Recognize which levels are most or least inclusive?
 - **Cells, tissues, organs, organ systems, organisms, populations, communities, ecosystems, biosphere**
 - Describe the differences between a population, community, and ecosystem.
 - **Population:** group of interbreeding individuals of the same species in a given area
 - **Community:** consists of all populations of all species in a given area
 - **Ecosystem:** a community interacting with its environment through energy transfer
- **Describe the underlying characteristics that unite all living things**
 - What are the major principles of living things?
 - **all living things require ongoing inputs of energy and raw materials**
 - **all living things sense and respond to change (homeostasis)**
 - **all living things use DNA as the carrier of genetic information**
 - What is the difference between a producer and a consumer?
 - **Producer:** makes its own food using energy from sunlight or self
 - **Consumer:** obtains energy and nutrients by feeding on other organisms
 - What is homeostasis?
 - **Process in which cells and organisms keep their internal conditions within tolerable ranges by sensing and responding to change in external conditions**
