The Death of Drawing David Scheer, 2014-06-05 The Death of Drawing explores the causes and effects of

the epochal shift from drawing to computation as the chief design and communication medium in architecture Drawing both framed the thinking of architects and organized the design and construction process to place architects at its center Its displacement by building information modeling BIM and computational design recasts both the terms in which architects think and their role in building production Author David Ross Scheer explains that whereas drawing allowed architects to represent ideas in form BIM and computational design simulate experience making building behavior or performance the primary object of design The author explores many ways in which this displacement is affecting architecture the dominance of performance criteria in the evaluation of design decisions the blurring of the separation of design and construction the undermining of architects authority over their projects by automated information sharing the elimination of the human body as the common foundation of design and experience the transformation of the meaning of geometry when it is performed by computers the changing nature of design when it requires computation or is done by a digitally enabled collaboration Throughout the book Scheer examines both the theoretical bases and the practical consequences of these changes The Death of Drawing is a clear eyed account of the reasons for and consequences of the displacement of drawing by computational media in architecture Its aim is to give architects the ability to assess the impact of digital media on their own work and to see both the challenges and opportunities of this historic moment in the history of their discipline

Clients and Users in Construction Kim Haugbølle, David Boyd, 2017-06-14 Clients have been identified as critical for building delivery but have been under researched with only a few studies about them This book seeks to address this gap A deeper look into the nature of construction clients and their relation to building users exposes more fundamental questions related to the activity of building and the activity in the building These fundamental questions include How do clients get what they want How do clients cope with the building process and How are clients being shaped by building s This book on clients and users is structured around three main themes Agency is concerned with the classical agency structure dichotomy on actions roles and responsibilities or put differently whether actors can act freely or are bound by structural constraints Governance is related to the interplay between clients and the supply system clients govern the supply system but are at the same time governed by the supply system through different processes and mechanisms Innovation deals with construction innovation and what part clients and users play in this struggle between change and stability The book includes theoretical and conceptual frameworks on what constitutes clients and users as well as case studies on R D themes of relevance to practice
