the status of a respected insider whose primary role is to defend existing institutional arrangements and its own privileged position. The mainstreaming of bioethics has resulted in its domestication; it is at home in the institutions it would once have viewed with skepticism and a central part of practices it would once have challenged. Contemporary bioethics is increasingly dominated by a conception of autonomy that detaches the value of choice from the value of the things chosen and the central role occupied by this conception makes it difficult for the bioethicist to make ethical judgments. Consequently, despite its very public successes, contemporary bioethics is largely failing to offer the ethical guidance it purports to be able to provide. In addition to providing a critique, this book offers an alternative framework that is designed to allow bioethicists to address the concerns that led to the creation of bioethics in the first place. This alternative framework is oriented around a conception of autonomy that works within the ethical guidelines provided by a contemporary form of virtue ethics and which connects the value of autonomous choice to a conception of human flourishing.

Uncertain Bioethics Stephen Napier, 2019-07-12

Bioethics is a field of inquiry and as such is fundamentally an epistemic discipline. Knowing how we make moral judgments can bring into relief why certain arguments on various bioethical issues appear plausible to one side and obviously false to the other. Uncertain Bioethics makes a significant and distinctive contribution to the bioethics literature by culling the insights from contemporary moral psychology to highlight the epistemic pitfalls and distorting influences on our apprehension of value. Stephen Napier also incorporates research from epistemology addressing pragmatic encroachment and the significance of peer disagreement to justify what he refers to as epistemic diffidence when one is considering harming or killing human beings. Napier extends these developments to the traditional bioethical notion of dignity and argues that beliefs subject to epistemic diffidence should not be acted upon. He proceeds to apply this framework to traditional and developing issues in bioethics including abortion, stem cell research, euthanasia, decision making for patients in a minimally conscious state, and risky research on competent human subjects.
