Name: \_\_\_\_\_

## Task 1: Introduction to the Biogeochemical Cycles

View the Biogeochemical Cycling video by Bozeman Science and answer the following questions.  
Full URL: <http://www.bozemanscience.com/biogeochemical-cycling>  
Tiny URL: <https://tinyurl.com/g682z4g>

1. What elements cycle between living and non-living organisms?

carbon, hydrogen, nitrogen, oxygen, phosphorus, sulfur

2. What is a mnemonic device to help you to remember the elements that life needs to survive?

chnops

Complete the table below about why each element in the biogeochemical cycle is important to life.

| Element | Why Is It Important to Life? |
|---------|------------------------------|
| 3. C    | carbon                       |
| 4. H    | hydrogen                     |
| 5. N    | nitrogen                     |
| 6. O    | oxygen                       |
| 7. P    | phosphorus                   |
| 8. S    | sulfur                       |

Complete the table below about how each element is stored and cycled between living and non-living things.

|                                 | 9. Water                                                               | 10. Carbon                                           | 11. Nitrogen                                                   | 12. Phosphorus                                                                      |
|---------------------------------|------------------------------------------------------------------------|------------------------------------------------------|----------------------------------------------------------------|-------------------------------------------------------------------------------------|
| Where is it stored?             | in the ocean reservoir                                                 | stored in the atmosphere                             | stored in the atmosphere                                       | stored in the rock                                                                  |
| How does it get into animals?   | by drinking it                                                         | by eating plants or animals that already have carbon | they eat the plants                                            | they going to feed on that and bring the phosphorus into them from the plants       |
| How does it get into plants?    | it gets into plants through their roots                                | through photosynthesis                               | 70% nitrogen turns into bacteria and gets to plants            | the rain will break the rock into soil and it will be absorbed through plants roots |
| How does it get recycled again? | the rain will break the rock into soil and it will be absorbed through | it gets recycled through respiration                 | were going to have bacteria and as we decompose dead and dying | as we die and decompose                                                             |
