Biological Diversity Conservation And The Law Biological Diversity Conservation And The Law:

International Law and the Conservation of Biological Diversity Michael Bowman, Catherine Redgwell, 1996-01-10

This work presents a thorough analysis of the biodiversity concept in international law and commentary on the 1992 United Nations Convention on Biological Diversity which was opened for signature following the 1992 UN Conference on Environment and Development. This Convention is the first international treaty explicitly to address all aspects of biodiversity ranging from the conservation and sustainable use of biological resources to access to biotechnology and the safety of activities related to modified living organisms. The work extends beyond the ambit of the Convention itself to examine the conservation of biodiversity in international law generally including measures for the protection of the terrestrial marine and Antarctic environment and particular features relating to sustainable use of biological resources *ex situ* conservation and plant genetic resources. It further analyses the controversial issue of intellectual property rights, the problems of implementation in the European Union and the United States, differences between developing and developed states and the role of indigenous peoples. This major new work has been written by members of the Committee on Environmental Law of the British Branch of the International Law Association following an earlier study on the subject of International Law and Global Climate Change. Graham Trotman 1991. It is the first major study of the Convention in the context in which it was negotiated and of the prospects for its implementation following the entry into force of the Convention on 29 December 1993.

Biological Diversity Conservation and the Law Cyrille de Klemm, Clare Shine, 1993. Covers the full spectrum of legal mechanisms available for conserving biodiversity. Part 1 discusses the scope of state powers to conserve wild species and habitats, legal mechanisms for controlling taking procedures for listing species in need of conservation measures, mechanisms for controlling trade and the challenges of enforcement. Part 2 covers area based conservation at local and national level as well as in transfrontier protected areas and areas beyond national jurisdiction. It discusses public ownership, voluntary agreements and regulatory measures and looks at a number of innovative instruments, planning controls, incentives and disincentives.

Biodiversity Conservation, Law and Livelihoods: Bridging the North-South Divide Michael I. Jeffery, Jeremy Firestone, Karen Bubna-Litic, 2008-01-07. The IUCN Academy of Environmental Law Research Studies third colloquium brought together more than 130 experts from 27 nations on nearly every continent. This book brings together a number of papers presented there and offers a global perspective on biodiversity conservation and the maintenance of sustainable cultures.

Biological Diversity Conservation and the Law Cyrille de Klemm (jurist), 1993 Transboundary Governance of Biodiversity Louis J. Kotzé, Thilo Marauhn, 2014-06-26 Transboundary Governance of Biodiversity compiles critical analysis of the regulatory frameworks applicable to the transboundary governance of biodiversity by specialists from Europe and Africa Drawing on their vast experience as lawyers political scientists and natural resource management experts they provide a critique and contemporary perspectives on what has become one of the most challenging aspects of global environmental governance in the Anthropocene effective biodiversity conservation in times of unprecedented environmental crises With a unique North South focus and a legal focus infused by multi disciplinary regulatory dimensions this peer reviewed publication offers a comprehensive analysis of international and regional environmental law frameworks applicable to the transboundary governance of biodiversity

Accessing Biodiversity and Sharing the Benefits Santiago Carrizosa, 2004 The book aims to address the lack of information on the experiences of others by providing a comparative analysis of national access and benefit sharing laws and policies in the 41 Pacific Rim countries that signed the CBD It provides key insights on the main characteristics of selected access and benefit sharing ABS policies and laws their development and implementation process It contains a detailed comparative analysis of existing laws and policies It presents four case studies of countries with regulations in place and contrasts them with four case studies of countries that are struggling to develop their regulations It ends by discussing options of an international regime on ABS and a summary analysis of the main lessons and recommendations from the study

The Use of Biodiversity in International Law Andreas Kotsakis, 2021-05-05 This book presents a legal genealogy of biodiversity of its strategic use before and after the adoption of the Convention on Biological Diversity 1993 This history of genetic gold details how with the aid of international law the idea of biodiversity has been instrumentalized towards political and economic aims A study of the strategic utility of biodiversity rather than the utility of

its protection under international law the book's focus is not therefore on the sustainable or non sustainable use of biodiversity as a natural resource but rather on its historical use as an intellectual resource Although biodiversity is still not being effectively conserved nor sustainably used the Convention on Biological Diversity and its parent regime persists now after several decades of operation This book provides the comprehensive answer to the question of the convention's continued existence Drawing from environmental history the philosophy of science political economy and development studies this book will be of interest to advanced undergraduate and postgraduate students in Environmental Law International Law Environmental Studies and Ecology
