Slater, 2011-10-28 Reflections on the metaphysics and epistemology of classification from a distinguished group of philosophers Contemporary discussions of the success of science often invoke an ancient metaphor from Plato's Phaedrus successful theories should carve nature at its joints But is nature really jointed Are there natural kinds of things around which our theories cut The essays in this volume offer reflections by a distinguished group of philosophers on a series of intertwined issues in the metaphysics and epistemology of classification The contributors consider such topics as the relevance of natural kinds in inductive inference the role of natural kinds in natural laws the nature of fundamental properties the naturalness of boundaries the metaphysics and epistemology of biological kinds and the relevance of biological kinds to certain questions in ethics *Carving Nature at Its Joints* offers both breadth and thematic unity providing a sampling of state of the art work in contemporary analytic philosophy that will be of interest to a wide audience of scholars and students concerned with classification **Concepts, Theories, and Rationality in the Biological Sciences** Gereon Wolters, 2022-05-31 A Unified Report on the State of the Art in the Philosophy of Biology In October 1993 the University of Pittsburgh hosted the Second Pittsburgh Konstanz Colloquium in the Philosophy of Science with a focus on the rapidly growing field of philosophy of biology An interdisciplinary group of philosophers and scientists came together to discuss the basic theories and concepts of biology and their connections with ethics economics and psychology The colloquium organizers strove to create an event that would provide attendees with a wide overview on the current state of the philosophy of biology with as many topics and views on these topics as possible Those presentations are gathered here in a volume that offers the reader a varied and thorough survey of the field **Encyclopedia of Global Studies** Helmut K. An Inquiry into the Philosophical Concept of Scholê Kostas Kalimtzis, 2017-01-12 Though the ancient Greek philosophical concept of schol is usually translated as leisure there is a vast difference between the two Leisure derived from Latin licere has its roots in Roman otium and connotes the uses of free time in ways permitted by the status quo Schol is the actualization of mind and one's humanity within a republic that devotes its culture to making such a choice possible This volume traces the background in Greek culture and the writings of Plato of a daring proposal presented by Aristotle that schol is a principle for political organization The concept of schol by and large did not survive Aristotle To sharpen our understanding of schol the book goes on to identify the concepts of leisure which we have inherited from the intellectuals of the Hellenistic and Roman empires and the early Church Fathers Schol also had its contrary ascholia busyness which Plato described as a social and psychological pathology and his analysis suggests why due to these ills current visions of a leisure society are highly unlikely

Hearings United States. Congress. House, 1935 **Protocols in Primary Care Geriatrics** John P. Sloan, 2012-02-02 The striking increase in average life expectancy during the twentieth century rates as one of the major events of our time We are in the midst of a social revolution one rooted not in a new ideology but in our changing population patterns For the first time in human history infants in fortunate nations like ours can expect to live well into their seventies and beyond This demographic revolution increases pressure on resources as it also creates further social change and new opportunities for older persons Such rapid changes have left most people living in the past with their generally negative attitudes about aging and elderly people The same outmoded beliefs are embedded in many of our health care programs In our youth oriented culture most of us still view old people as physically decrepit or in rapid inevitable decline Mentally they are viewed as forgetful or childish with little ability to learn and adapt Socially and economically they are often considered a burden With such stereotypes where is the expectation and encouragement for their continuing capacity to enrich their own lives and to enrich society These deep seated cultural stereotypes do not describe accurately the new wave of elderly persons or their potential contributions to society Today's aging individuals are mostly far from decrepit fewer than 25 percent experience any disability and fewer than 5 percent are in nursing homes Intellectually given new opportunities to learn and grow they thrive
