An Ethnography of Hunger Kristin Phillips, 2018-08-29 In *An Ethnography of Hunger* Kristin D Phillips examines how rural farmers in central Tanzania negotiate the interconnected projects of subsistence politics and rural development Writing against stereotypical Western media images of spectacular famine in Africa she examines how people live with rather than die from hunger Through tracing the seasonal cycles of drought plenty and suffering and the political cycles of elections development and state extraction Phillips studies hunger as a pattern of relationships and practices that organizes access to food and profoundly shapes agrarian lives and livelihoods Amid extreme inequality and unpredictability rural people pursue subsistence by alternating between and sometimes combining rights and reciprocity a political form that she calls subsistence citizenship Phillips argues that studying subsistence is essential to understanding the persistence of global poverty how people vote and why development projects succeed or fail

Capitalism and the Death Drive Byung-Chul Han, 2021-05-18 What we call growth today is in fact a tumorous growth a cancerous proliferation which is disrupting the social organism These tumours endlessly metastasize and grow with an inexplicable deadly vitality At a certain point this growth is no longer productive but rather destructive Capitalism passed this point long ago Its destructive forces cause not only ecological and social catastrophes but also mental collapse The destructive compulsion to perform combines self affirmation and self destruction in one We optimize ourselves to death Brutal competition ends in destruction It produces an emotional coldness and indifference towards others as well as towards one's own self The devastating consequences of capitalism suggest that a death drive is at work Freud initially introduced the death drive hesitantly but later admitted that he couldn't think beyond it as the idea of the death drive became increasingly central to his thought Today it is impossible to think about capitalism without considering the death drive
