Between Languages And Cultures Between Languages And Cultures:

Between Languages and Cultures Rosemary Chapman, 2009-04-01 Gabrielle Roy is one of the best known figures of Quebec literature yet she spent much of the first thirty years of her life studying working and living in English For Roy as a member of Manitoba's francophone minority bilingualism was a necessary strategy for survival and success How did this bilingual and bicultural background help shape her work as a writer in French The implications of her linguistic and cultural identity are explored in chapters looking at education language translation and the representation of Canada's other minorities from the immigrants in Western Canada to the Inuit of Ungava What emerges is a new reading of Roy's work Drawing on archival material postcolonial theory and translation studies Between Languages and Cultures explores the traces and effects of Roy's intimate knowledge of English language and culture challenging and augmenting the established view that her work is distinctly French Canadian or Québécois

Language, Culture, and the Embodied Mind Joseph Shaules, 2019-12-04 There is an odd contradiction at the heart of language and culture learning Language and culture are so to speak two sides of a single coin language reflects the thinking values and worldview of its speakers Despite this there is a persistent split between language and culture in the classroom Foreign language pedagogy is often conceptualized in terms of gaining knowledge and practicing skills while cultural learning goals are often conceptualized in abstract terms such as awareness or criticality This book helps resolve this dilemma Informed by brain and mind sciences its core message is that language and culture learning can both be seen as a single interrelated process the embodiment of dynamic systems of meaning into the intuitive mind This deep learning process is detailed in the form of the Developmental Model of Linguaculture Learning DMLL Grounded in dynamic skill theory the DMLL describes four developmental levels of language and culture learning which represents a subtle yet important shift in language and culture pedagogy Rather than asking how to add culture into language education we should be seeking ways to make language and culture learning deeper more integrated embodied experiential and transformational This book provides a theoretical approach including practical examples for doing so
