Beyond Confrontation Learning Conflict Resolution In The Post Cold War Era:

Beyond Confrontation John A. Vasquez, 1995 An interdisciplinary approach to the politics of peace The Power of Power Politics John A. Vasquez, 1998 In this new and much expanded edition of his classic study John Vasquez examines the power of the power politics perspective to dominate inquiry and evaluates its ability to provide accurate explanations of the fundamental forces underlying world politics *War and Peace in International Rivalry* Paul Diehl, Gary Goertz, 2010-06-02 This book provides the first detailed analysis of international rivalries the long standing and often violent confrontations between the same pairs of states The book addresses conceptual components of rivalries and explores the origins dynamics and termination of the most dangerous form of rivalry enduring rivalry since 1816 Paul Diehl and Gary Goertz identify 1166 rivalries since 1816 They label sixty three of those as enduring rivalries These include the competitions between the United States and Soviet Union India and Pakistan and Israel and her Arab neighbors The authors explain how rivalries form evolve and end The first part of the book deals with how to conceptualize and measure rivalries and presents empirical patterns among rivalries in the period 1816 1992 The concepts derived from the study of rivalries are then used to reexamine two central pieces of international relations research namely deterrence and democratic peace studies The second half of the book builds an explanation of enduring rivalries based on a theory adapted from evolutionary biology punctuated equilibrium The study of international rivalries has become one of the centerpieces of behavioral research on international conflict This book by two of the scholars who pioneered such studies is the first comprehensive treatment of the subject It will become the standard reference for all future studies of rivalries Paul F Diehl is Professor of Political Science and University Distinguished Teacher Scholar University of Illinois He is the coeditor of *Reconstructing Realpolitik* and coauthor of *Measuring the Correlates of War* Gary Goertz is Assistant Professor of Political Science University of Arizona and is the coauthor with Paul Diehl of *Territorial Change and International Conflict* Constructive Conflicts Louis Kriesberg, 1998 This comprehensive analysis of all kinds of social and political conflicts reveals an important but neglected truth conflicts often are waged constructively Drawing on past and current theory research and practice *Constructive Conflicts* presents a systematic and coherent approach to understanding how a wide variety of struggles can be waged constructively in a new global context Visit our website for sample chapters Good Mediator Su-Mi Lee, 2019-02-13 This book examines how mediators relational characteristics can alter the outcome of mediation in international militarized disputes Rather than focusing on neutrality and bias that are rigorously discussed in the mediation literature this book redefines the sources of effective mediators impartiality and interest and shows how such seemingly opposing characteristics of a mediator can lead to successful mediation through different channels complementing each other This book also uncovers the two dimensions of mediator trust fairness and capacity For mediation to be successful disputants must trust that mediators are fair and capable of leading to successful mediation The identification of these two sources is crucial as each of the two relational characteristics

of mediators discussed above improves each dimension of the mediator trust Moreover this book explores how impartial and interested mediators are more or less effective in particular conflicts characterized by the nature of dispute the nature of disputants relationships and the nature of mediators The book s empirical analysis as well as case studies on the mediation cases led by the Philippines and Syria in the Borneo confrontation and Yemen dispute respectively demonstrate how the levels of mediator impartiality and mediator interest counterbalance each other in leading to mediation success

Brokering Peace in Nuclear Environments Moeed Yusuf, 2018-05-08 One of the gravest issues facing the global community today is the threat of nuclear war As a growing number of nations gain nuclear capabilities the odds of nuclear conflict increase Yet nuclear deterrence strategies remain rooted in Cold War models that do not take into account regional conflict **Brokering Peace in Nuclear Environments** offers an innovative theory of brokered bargaining to better understand and solve regional crises As the world has moved away from the binational relationships that defined Cold War conflict while nuclear weapons have continued to proliferate new types of nuclear threats have arisen Moeed Yusuf proposes a unique approach to deterrence that takes these changing factors into account Drawing on the history of conflict between India and Pakistan Yusuf describes the potential for third party intervention to avert nuclear war This book lays out the ways regional powers behave and maneuver in response to the pressures of strong global powers Moving beyond debates surrounding the widely accepted rational deterrence model Yusuf offers an original perspective rooted in thoughtful analysis of recent regional nuclear conflicts With depth and insight **Brokering Peace in Nuclear Environments** urges the international community to rethink its approach to nuclear deterrence

The First Fifty Years of Peace Research David J. Dunn, 2018-01-18 Peace research first emerged as an explicit academic area of study in the 1950s Pioneers of peace research included Wright Richardson and Lenz and this book examines their contribution and that of the frontiersmen who developed the study further establishing peace research in its own right Assessing the evolution status and significance of peace research after fifty years this novel and comprehensive book is relevant not only to students of peace research but also to the developing debates within international relations and security studies This is where there are real problems associated with the understanding of new problems and issues by reference to traditional concepts and categories The book will attract a broad market in the fields of international relations politics and social theory as well as scholars in peace studies

Resolving Environmental Disputes Roger Sidaway, 2013-06-17 Thought provoking important and instructive this is a masterly guide to dealing with environmental conflicts PROFESSOR DES THOMPSON Scottish Natural Heritage This is a long awaited book Many of us in the environmental policy management and decision making business have been struggling along to make environmental values and developmental values fit This book helps us to have a better means for finding the shared values and actions that most environmental issues entail It has the heft of sound scholarship and the street sense of someone who has actually been there and done that WILLIAM R *Mediating International Crises* Jonathan

Wilkenfeld, Kathleen Young, David Quinn, Victor Asal, 2007-05-07 This book investigates the crisis management mechanism mediation by third parties to determine the effectiveness of mediation efforts in crisis negotiations International Mediation Bias and Peacemaking Isak Svensson, 2014-11-27 This book examines the effect of biased and neutral mediators in civil wars Based on analysis of both global data and case studies of contemporary peace processes including India and Norway in Sri Lanka China in Cambodia US in Israel Palestine and Russia in Georgia the book makes two main contributions First it explores the role of biased mediators in contemporary peace processes The author develops a theory explaining why biased mediators are more effective than their neutral counterparts and the book identifies four different mechanisms through which biased mediators can be effective peace brokers By developing a comprehensive set of mechanisms to explain bias mediation the work deepens understanding of biased mediators in general and their role in resolving civil conflict in particular The second contribution offered is a novel way of measuring mediation success Previous research has concentrated on settlement behavior or implementation While these conceptualisations of mediation success all have merit they fail to address how the basic incompatible positions are regulated This book focuses on mediators ability to regulate core compatibilities by crafting institutional peace arrangements that generally are considered to enhance the prospect for durable peace This approach has wider implications for peace and conflict research by bringing together research on durability of peace and studies on international mediation two fields of research which hitherto have been kept apart This book will be of much interest to students of international mediation conflict management civil wars security studies and IR in general
