Readers' Guide to Periodical Literature, 1909 **The Amber Forest** George O. Poinar, Roberta Poinar, 1999 The Poinars are world leaders in the study of amber fossils and have spent years examining the uniquely rich supply that has survived from the ancient forests of the Dominican Republic. They draw on their research here to reconstruct in words, drawings, and spectacular color photographs the ecosystem that existed on the island of Hispaniola between fifteen and forty five million years ago. The Poinars present richly detailed drawings of how the forests once appeared. They discuss how and when life colonized Hispaniola and what caused some forms to become extinct. Along the way they describe how amber is formed, how and where it has been preserved, and how it is mined, sold, and occasionally forged for profit today.
