*Children's Books in Print* R R Bowker Publishing, Bowker, 1999-12      **Biology** Teresa Audesirk, Gerald Audesirk, 1999  
2000 2005 State Textbook Adoption Rowan Salisbury      **Classroom Strategies for Interactive Learning** Doug Buehl, 2017  
Educators across content areas have turned to Classroom Strategies for Interactive Learning for almost two decades. This fully updated fourth edition delivers rich practical research-based strategies that readers have found invaluable in the context of today's classrooms. Doug has written all new chapters that focus on the instructional shifts taking place as the Common Core State Standards are implemented across the United States. These introductory chapters will help you do the following:  
Understand the research base for comprehension strategies in content classrooms.  
Learn how to tap into students' background knowledge to enhance comprehension of complex texts and build new knowledge.  
Show learners how to question a text.  
Teach reading and thinking through a disciplinary lens.  
At the heart of this edition are more than forty classroom strategies with variations and strategy indexes that identify the instructional focus of each strategy, pinpoint the text frames in play as students read and learn, and correlate students' comprehension processes across the phases of strategy implementation. In addition, each strategy is cross-referenced with the Common Core's reading, writing, speaking, listening, and language standards.  
**Developing Readers in the Academic Disciplines** Doug Buehl, 2023-10-10  
Being literate in an academic discipline is more than being able to read and comprehend text; you can think, speak, and write as a historian, scientist, mathematician, or artist. Author Doug Buehl strips away the one-size-fits-all approach to content area literacy and presents an instructional model for disciplinary literacy which honors the discipline and helps students learn within that area. In this revised second edition, *Developing Readers in the Academic Disciplines* shows how to help students adjust their thinking to comprehend a range of complex texts that fall outside their reading comfort zones. Inside you'll find instructional tools that adapt generic literacy practices to discipline-specific variations, strategies for frontloading instruction to activate and build background knowledge, new approaches for encouraging inquiry around disciplinary texts, in-depth exploration of the role of argumentation in informational text, numerous examples from science, mathematics, history, and social studies, English language arts, and related arts to show you what vibrant learning looks like in various classroom settings. Designed to be a natural companion to Buehl's *Classroom Strategies for Interactive Learning*, *Developing Readers in the Academic Disciplines* introduces teachers from all disciplines to new kinds of thinking and ultimately teaching that helps students achieve new levels of understanding.  
**Forthcoming Books** Rose Arny, 2003      Taylor & Francis Group, 2010-12-31
