Wood,2005 Michael G Wood's straightforward and complete lab manual guides students through hands on exercises that reinforce concepts they've learned in their anatomy physiology lecture course. The full color illustrations and step by step instructions are designed to help students visualize structures, understand three dimensional relationships and comprehend complex physiological processes. With many different format options available and powerful digital resources, it's easy to customize this laboratory manual to best fit your course. **Pervasive and Mobile Sensing and Computing for Healthcare** Subhas Chandra Mukhopadhyay, Octavian A. Postolache, 2012-09-14. The pervasive healthcare system focuses towards achieving two specific goals: the availability of eHealth applications and medical information anywhere and anytime, and the invisibility of computing. Furthermore, the pervasive health system encompasses new types of sensing and communication of health information as well as new types of interactions among health providers and people among patients, among patients and researchers, and among patients and corporations. This book aims at promoting the discussion on current trends in technologies and concepts that help integrate health monitoring and healthcare more seamlessly to our everyday lives regardless of space and time, but also present cutting edge perspectives and visions to highlight future development. The book presents not only the state of the art technologies and solutions to tackle the critical challenges faced by the building and development of the pervasive health system, but also potential impact on society at social, medical, and technological level. *Laboratory Investigations in Anatomy and Physiology* Stephen N. Sarikas, 2007. This concise lab manual is designed for instructors who wish to avoid cookbook style lab instruction for Anatomy Physiology.
