Introduction

XTIDE Universal BIOS is mainly used with [XTIDE controller](#) to use modern IDE drives on PC/XT systems. XTIDE Universal BIOS supports 16- and 32-bit IDE controllers found in later ISA, VLB and PCI systems. Thus XTIDE Universal BIOS can be used to overcome 504 MiB hard disk size limit that many old BIOSes have.

Features

Some of the features included in XTIDE Universal BIOS are ... * Supports up to 5 IDE controllers (10 drives) * Accesses up to 8.4 GB hard disk space (BIOS CHS limit) * Block mode transfers * Hard disk autodetection * Autodetected CHS parameters can be overridden to make drive appear smaller than it is * Boot menu for selecting any floppy drive or hard disk to boot from, including hard disks that are not handled by XTIDE Universal BIOS * Compact Flash and Microdrive support * Support for most 8-, 16-, and 32-bit IDE controllers * IRQ and polling operation modes ...and many more.

Different builds

At the moment there are three different builds included in the XTIDE Universal BIOS zip file: * IDE_XT.BIN (XT build)

*XT build uses only instructions supported by 8086/8088 making it the only build that can be used on any PC, including the original IBM PC model 5150. * IDE_XTR.BIN (XT+ build) XT+ build has the same features as the XT build but XT+ build uses instructions introduced in 80186/80188. Those instructions are supported by all later x86 CPUs, including NEC V20/V30. 8-bit transfers rates will be better thanks to INS and OUTS instructions. * IDE_AT.BIN (AT build) AT build is meant for all AT class machines (16-bit or 32-bit bus). AT build supports OS hooks to allow operating system to do some processing while drive seeks the requested data. By default, the AT build is configured to full mode to take advantage of all the features the XTIDE Universal BIOS offers.*

Installing XTIDE Universal BIOS

Hardware supporting XTIDE Universal BIOS ROM

The most convenient way to use XTIDE Universal BIOS is to use [XTIDE card](#). It can be used on any PC with free 8-bit ISA slot. You might not want to connect any drives to it in 16- or 32-bit systems since 8-bit transfer will be very slow. Using XTIDE card allows EEPROM flashing so it is really easy to update XTIDE Universal BIOS.

Another option is to use any card with free ROM socket for 8 kiB or larger ROMs. Official XTIDE builds are meant for 8 kiB ROMs but you can burn it on larger ROM if you append enough zeroes to the end (only append zeroes so checksum does not change). Many network cards have unused ROM sockets but there are also few multi I/O cards and IDE controllers with ROM sockets.

You don't need EPROM/EEPROM programmer if you already have XTIDE card. XTIDE card can be used to flash additional EEPROMs (2864) that can be moved to EPROM (2764) sockets.

Configuring and flashing BIOS

XTIDE Universal BIOS comes with DOS utility called [idectg.com](#). It configures XTIDE Universal BIOS and also works as a generic EEPROM flasher supporting EEPROM sizes up to 16 kiB. [Idectg.com](#) allows saving changes to BIOS images so that they can be programmed with other programming software or device.

Other things to know

CTRL can be held down to skip XTIDE Universal BIOS initialization. Only drive detection will be skipped when late initialization is used.

Internet Guide to Knowledge Management and Intellectual Capital

Sabine Pekarz, 2002-03-07 Inhaltsangabe Abstract This survey has shown that although the internet is full of information it is difficult to find the information required fast Before starting an internet survey it is essential to be conscious of the intention

of the search and the expected results and to translate this into one or more keywords The intention of the keyword searches knowledge management and intellectual capital was to find out how the topic is treated on different pages The categorization by content has shown that a main part of the links can be assigned in the advertisement categories This is the case for both the hits of MetaCrawler and those of Umap A further community of the results of the two search instruments is that the categories knowledge base and best practices only take a small part whereas the categories content discussion and collection of resources are relatively well attended Great importance has been attached to the categories content discussion in the index and chapter 6 is fully dedicated to interesting links concerning the content This is because the discussion of the topics combined with definitions and explanations is the background and the basis for the rest of the categories As the assignment to the categories content discussion does not declare anything about the quality of the discussions the index in chapter 4 has to be included in the study Strictly speaking a great part of those links is dedicated to advertisement and gives some explanations concerning the topics It has been detected that most of the pages with content discussion give only a short introduction into the topic The pages that examine the topics more closely are an exception to the rule Five links of this minority are introduced in chapter 6 Two of them are very interesting pages concerning the content They are listed at top position because different opinions concerning knowledge management and intellectual capital are introduced the topics are treated in great detail and the explanations are good and quite easy to duplicate In order to find out if the results are capable to represent the totality the reliability of the categorization built up with Umap artificial intelligence and that built by human intelligence have been analyzed with the means of hypotheses The test of the hypotheses that are based on a comparison of the results and processes of the categorizations has shown that the categorization by **A Life Devoted to Quality of Life** Filomena Maggino, 2015-10-20 This Festschrift is published in honor of Alex C Michalos a great scholar and inspiration to many upcoming and famous academics and practitioners The Festschrift celebrates his lifelong outstanding scientific and cultural contribution to Quality of Life Research It contains contributions written by the most prestigious and renowned scholars in the field of social indicators research and quality of life studies Taken together the contributions from scholars around the world reflect Michalos stance that even though there may be differences in individual scientific positions the language in the field of quality of life has no limits and boundaries GEN Guide to Biotechnology Companies ,1998
