

Fair Value

VS

Market Value

Fair Value

Fair value refers to the actual worth of asset, which is derived fundamentally and is not determined by the factors of any market forces.

Fair Value

Fair value is most commonly used in the market instead of any other **valuation method**. As in the fair value, there is an accuracy of the valuation of the asset and is a true measure of the method.

Fair Value

The fair value of an asset often remains the same, and it does not fluctuate more frequently when compared to the market value.

Fair Value

Fair value accounting measure is globally accepted and is also accepted in the International Financial Reporting Standards (IFRS) and Generally accepted accounting principles (GAAP)

Market Value

Market value is solely determined by the factors of the demand and supply, and it is the value which is not determined by the fundamental of an asset.

Market Value

Market value is not the most common valuation method which is used by the companies due to its shortcomings and limitations.

Market Value

Market value as it is determined by the supply and the demand forces often tends to fluctuate.

Market Value

The market Value valuation method is the one that is generally not frequently used and is not globally acceptable.

Value Vs Market Value
