And Beastly Morality Animals Ethical Agents:

Beastly Morality Jonathan K. Crane, 2015-12-01 We have come to regard nonhuman animals as beings of concern and we even grant them some legal protections But until we understand animals as moral agents in and of themselves they will be nothing more than distant recipients of our largesse Featuring original essays by philosophers ethicists religionists and ethologists including Marc Bekoff Frans de Waal and Elisabetta Palagi this collection demonstrates the ability of animals to operate morally process ideas of good and bad and think seriously about sociality and virtue Envisioning nonhuman animals as distinct moral agents marks a paradigm shift in animal studies as well as philosophy itself Drawing not only on ethics and religion but also on law sociology and cognitive science the essays in this collection test long held certainties about moral boundaries and behaviors and prove that nonhuman animals possess complex reasoning capacities sophisticated empathic sociality and dynamic and enduring self conceptions Rather than claim animal morality is the same as human morality this book builds an appreciation of the variety and character of animal sensitivities and perceptions across multiple disciplines moving animal welfarism in promising new directions

Animals as Legal Beings Maneesha Deckha, 2020 In *Animals as Legal Beings* Maneesha Deckha critically examines how Canadian law and by extension other legal orders around the world participate in the social construction of the human animal divide and the abject rendering of animals as property Through a rigorous but cogent analysis Deckha calls for replacing the exploitative property classification for animals with a new transformative legal status or subjectivity called beingness In developing a new legal subjectivity for animals one oriented toward respecting animals for who they are rather than their proximity to idealized versions of humanness *Animals as Legal Beings* seeks to bring critical animal theorizations and animal law closer together Throughout Deckha draws upon the feminist animal care tradition as well as feminist theories of embodiment and relationality postcolonial theory and critical animal studies Her argument is critical of the liberal legal view of animals and directed at a legal subjectivity for animals attentive to their embodied vulnerability and desirous of an animal friendly cultural shift in the core foundations of anthropocentric legal systems Theoretically informed yet accessibly presented *Animals as Legal Beings* makes a significant contribution to an array of interdisciplinary debates and is an innovative and astute argument for a meaningful more than human turn in law and policy

An Ethical View of Human-Animal Relations in the Ancient Near East Idan Breier, 2022-10-19 Exploring the earliest literary evidence for human animal relations this volume presents and analyzes biblical and Mesopotamian Sumerian Assyrian and Babylonian sources from the third millennium BCE through to the consolidation of the biblical literature in the first millennium BCE Key Features Provides the first comprehensive study of these texts from an ethical perspective Examines proverbs popular aphorisms myths epic literature wisdom literature historiography prophecy and law codes Applies methodology from current contemporary biblical and ancient Near Eastern scholarship and human animal ethics thereby raising new questions that lead to fresh insights *An Ethical View of Human*

Animal Relations in the Ancient Near East is essential reading for scholars and graduate students of animal ethics applied ethics and biblical studies

Multicultural and Religious Perspectives on Protecting the Environment, the Biosphere, and Biodiversity Joseph Tham, John Lunstroth, Sameer Advani, 2025-09-30 This thought provoking volume unites bioethics experts from seven major world religions Buddhism Christianity Confucianism Daoism Hinduism Islam and Judaism alongside secular thinkers to explore environmental protection through the lens of the UNESCO Declaration on Bioethics and Human Rights It foregrounds the power of diverse perspectives in addressing one of humanity's most pressing challenges the ecological crisis The contributions provide rich and distinct religious and cultural viewpoints as they confront the anthropological ethical and social dimensions of this crisis Showcasing dialogue where traditions and philosophies collide they offer unique insights into global bioethics and human rights that should inspire new ways of thinking and foster meaningful collaboration in the fight for our planet's future The book is valuable reading for researchers scholars and students in bioethics environmental ethics religious studies and beyond

Theological Ethics through a Multispecies Lens Celia E. Deane-Drummond, 2019-11-05 There are two driving questions informing this book The first is where does our moral life come from It presupposes that considering morality broadly is inadequate Instead different aspects need to be teased apart It is not sufficient to assume that different virtues are bolted onto a vicious animality red in tooth and claw Nature and culture have interlaced histories By weaving in evolutionary theories and debates on the evolution of compassion justice and wisdom it shows a richer account of who we are as moral agents The second driving question concerns our relationships with animals Deane Drummond argues for a complex community based multispecies approach Hence rather than extending rights a more radical approach is a holistic multispecies framework for moral action This need not weaken individual responsibility She intends not to develop a manual of practice but rather to build towards an alternative philosophically informed approach to theological ethics including animal ethics The theological thread weaving through this account is wisdom Wisdom has many different levels and in the broadest sense is connected with the flow of life understood in its interconnectedness and sociality It is profoundly theological and practical In naming the project the evolution of wisdom Deane Drummond makes a statement about where wisdom may have come from and its future orientation But justice compassion and conscience are not far behind especially in so far as they are relevant to both individual decision making and institutions

The Creative Lives of Animals Carol Gigliotti, 2025-10-07 The Creative Lives of Animals offers readers intimate glimpses of how animals from elephants to alligators to ants apply the creative process in their lives requiring a redefinition of creativity that includes animals as essential contributors to biodiversity

Animals in Heaven? Terry Martin, 2024-09-26 Christians of all traditions have often puzzled with the question Do dogs go to heaven Drawing on Catholic teaching and on his long pastoral experience as a parish priest Terry Martin expands that concept to consider wider issues around all animals domesticated and free living and why they are here Within a context of Christian faith he seeks to

understand the place of animals in God's complex creation and the relationship that human beings have for good or ill with those animals. More than that, he looks at the big questions which so many ask about who under God animals are and what meaning if any animal lives have from a Catholic Christian perspective.

Animals and Religion Dave Aftandilian, Barbara R. Ambros, Aaron S. Gross, 2024-02-06

What do animals other than human animals have to do with religion? How do our religious ideas about animals affect the lives of real animals in the world? How can we deepen our understanding of both animals and religion by considering them together? *Animals and Religion* explores how animals have crucially shaped how we understand ourselves, the other living beings around us, and our relationships with them. Through incisive analyses of religious examples from around the world, the original contributions to this volume demonstrate how animals have played key roles in every known religious tradition, whether as sacred beings, symbols, objects of concern, fellow creatures, or religious teachers. And through our religious imagination, ethics, and practices, we have deeply impacted animal lives, whether by domesticating, sacrificing, dominating, eating, refraining from eating, blessing, rescuing, releasing, commemorating, or contemplating them. Drawing primarily on perspectives from religious studies and Christian theology, augmented by cutting-edge work in anthropology, biology, philosophy, and psychology, *Animals and Religion* offers the reader a richer understanding of who animals are and who we humans are. Do animals have emotions? Do they think or use language? Are they persons? How we answer questions like these affects diverse aspects of religion that shape not only how we relate to other animals but also how we perceive and misperceive each other along axes of gender, race, and disability. Accessibly written and thoughtfully argued, *Animals and Religion* will interest anyone who wants to learn more about animals, religion, and what it means to be a human animal.

Animal Ethics in the Age of Humans Bernice Bovenkerk, Jozef Keulartz, 2016-09-21

This book provides reflection on the increasingly blurry boundaries that characterize the human-animal relationship. In the Anthropocene, humans and animals have come closer together, and this asks for rethinking old divisions. Firstly, new scientific insights and technological advances lead to a blurring of the boundaries between animals and humans. Secondly, our increasing influence on nature leads to a rethinking of the old distinction between individual animal ethics and collectivist environmental ethics. Thirdly, ongoing urbanization and destruction of animal habitats leads to a blurring between the categories of wild and domesticated animals. Finally, globalization and global climate change have led to the fragmentation of natural habitats, blurring the old distinction between in situ and ex situ conservation. In this book, researchers at the cutting edge of their fields systematically examine the broad field of human-animal relations, dealing with wild, liminal, and domestic animals, with conservation and zoos, and with technologies such as biomimicry. This book is timely in that it explores the new directions in which our thinking about the human-animal relationship are developing. While the target audience primarily consists of animal studies scholars coming from a wide range of disciplines, including philosophy, sociology, psychology, ethology, literature, and film studies, many of the topics that are discussed have relevance beyond a purely theoretical one, as such, the

book also aims to inspire for example biologists conservationists and zoo keepers to reflect on their relationship with animals

Face to Face with Animals Peter Atterton, Tamra Wright, 2019-04-16 This is the first volume of primary and secondary source material dedicated solely to the animal question in Levinas Drawing on previously unpublished material including the recent discovery and digitization of the original French recording of an interview with Levinas that took place in 1986 it seeks to give fresh impetus to the debate surrounding the moral status of animals in Levinas's work The book offers ten essays by leading scholars along with a general introduction that places Levinas's philosophy in the context of the growing field of animal ethics The aim of the volume is to encourage dialogue on how we can extend Levinas's ethics beyond its traditional human confines and to spur further research on the opportunities and challenges it raises
