Barahal,Elizabeth Pugliano,2024-11-21 This edited volume explores the historical practical and pedagogical possibilities for expressing and cultivating empathy through works of art While aspects of what we today recognize as empathy has nestled in the artistic experiences and philosophies of all ages the subjective and elusive nature of empathic responses has often resulted in the relegation of empathy to the margins of art historical inquiry Moving into the second quarter of the twenty first century amidst global health crises civic unrest political turmoil and persistent social inequities and injustices this capacity to feel with and as someone or something outside of ourselves is more critical than ever Probing the very notion of empathy contributions address themes ranging from environmental and social justice to identity and inclusion to transdisciplinary pedagogies and practices each with a critical eye to how works of art not only appeal to empathic sensibilities but might play an active role in developing capacities for empathy in viewers Multidisciplinary Approaches to

Culminating Student Experiences Michael G. Strawser,Robin Yaure,2024-05-14 Despite the relatively recent popularity of culminating experiences a multidisciplinary and practical resource that provides information for all types of culminating student experiences is not yet available The idea for this volume arose because of the recognition that a holistic and applied resource for those looking to have general knowledge of different ways to assess student learning especially at the undergraduate level was lacking This text seeks to fill a gap and provide a historical context for culminating experiences suggestions for assessment foundational knowledge for different types of projects and finally approaches to using these experiences in various disciplines Because of the information desired experts in their field from a wide variety of disciplines were approached to be chapter contributors This resource focuses predominantly on undergraduate students but many of the chapters can either be applied to both undergraduate and graduate students e g thesis or specifically focus on the graduate student population e g dissertation **Anti-intellectualism to Anti-rationalism to Post-truth Era** Robert J. Thompson

Jr.,2022-02-14 Anti intellectualism to Anti rationalism to Post truth Era The Challenges for Higher Education argues that emergence of the post truth world is evidence that anti intellectualism long recognized as a characteristic of American culture has morphed into anti rationalism as a surging force in American society that threatens our collective commitment to rationality A post truth world however is not an immutable condition and cannot be accepted as the new norm The author argues that American higher education take responsibility for combating anti rationalism by promoting the development of student s personal attributes that constitute a rational mind set and rationalist identity such that they hold themselves accountable for commitments to seeking truth and the value of critical thought and reasoned discourse as defining element of their way of being in the world Scholarship exists across many disciplines regarding anti intellectualism and anti rationalism in American society and the personal attributes that together constitute a rational mind set including an

evaluativist personal epistemology open mindedness and conscientiousness and a rationalist identity The author brings the perspective of a psychologist to the analysis and synthesis of this scholarship and the implications for educational practices that are effective in promoting the development of student s rational mind set and rationalist identity necessary to combat anti rationalism and the post truth world
