Tony Frontier, James Rickabaugh

Beyond School Improvement The Journey To Innovative Leadership:

Beyond School Improvement Robert Davidovich, 2010 The authors discuss four elements of change and outline five essential practices for leading dynamic innovative educational systems that prepare students for a changing world

Beyond School Improvement, 2010 Filled with anecdotal examples reflection exercises and practical strategies this is a useful and timely resource for educators seeking to understand and influence educational innovation and transformation in the 21st century

Harness the Power of Reflection Ron Nash, 2011-04-07 Elevate your team's attitude from whatever to whatever it takes Seasoned educator Ron Nash inspires all school staff members to embark on their own continuous improvement journeys and model that experience for their students This book provides a framework for individual reflection and evaluation of schools processes as part of a professional development program Included are strategies and examples from successful schools nationwide The results speak for themselves Inspired and empowered staff members Active classrooms with engaged students who enjoy school A customer service oriented culture where parents feel welcome and valued A schoolwide commitment to sustaining improvement efforts

Leading by Design Cassandra Erkens, Eric Twadell, 2012-01-31 By focusing on what students learn rather than what they are taught schools can redefine their mission and begin the transition to a professional learning community After interviewing and observing principals administrators and teachers the authors identify seven leadership practices that effective PLC leaders share along with the techniques that have led them to sustainable success

Five Levers to Improve Learning Tony Frontier, James Rickabaugh, 2014-01-08 Why have decades of school reform had so little measurable effect on student achievement Why have billions of dollars spent on technology small school initiatives and school choice options failed to improve our schools Too often educators are simply pulling the wrong levers say Tony Frontier and James Rickabaugh They explain that the various components of schooling fall into five categories structure sample standards strategy and self Understanding how these five levers work and their relative power can help unlock the potential for lasting improvements in teaching and learning The authors show readers that changes to structure and sample how schools are organized and how students are grouped will not be effective without changes to standards expectations for student learning strategy instructional strategies to engage students in meaningful learning and self the set of beliefs teachers and students have about their capacity to be effective At the heart of this book is a simple message for teachers administrators board members and education policymakers at all levels the key to success is not doing more work and making more changes but doing the right work and making the right changes

Demystifying Professional Learning Communities Kristine Kiefer Hipp, Jane Bumpers Huffman, 2010-02-16 The purpose of this book is to clearly define an approach to school improvement that uses professional learning community PLC practices to achieve school improvement and success for every student This book offers information examples and case studies to clarify the concept of a PLC to respond to critical issues in schools and to support educational leaders in addressing the important mandates of

accountability and school improvement As school leaders proactively lead efforts to create learning communities their schools districts and staff will incorporate knowledge skills and practices that focus on teaching and learning for all The authors findings will assist leaders change agents policy makers and university faculty in guiding schools toward creating and maintaining PLCs as they sustain school improvement for student learning

Outcome-Based Strategies for Adult Learning Jones, Janice E., Baran, Mette L., Cosgrove, Preston B., 2018-08-17 The definition of education and learning has been changing in recent years as the field experienced and is still experiencing many changes One of those changes is a rise in adult learners in higher education In order to cope with this particular change and set their classrooms up for success it is vital for educators to be aware of and fluent in adult instructional strategies Outcome Based Strategies for Adult Learning provides emerging research exploring the theoretical and practical aspects of nontraditional education and applications within curriculum development and instructional design Featuring coverage on a broad range of topics such as experiential learning instructional design and formative assessment this book is ideally designed for educators academicians educational professionals researchers and upper level students seeking current research on how instructional strategies can be tied to assessment

More Than a SMART Goal Anne E. Conzemius, Terry Morganti-Fisher, 2011-11-01 Setting data informed high priority SMART goals is a critical step in school improvement that is widely acknowledged However goals themselves don't drive improvement they must be aligned with the school improvement process curriculum instruction assessment practices mandates and professional development Understand how to properly use the SMART goal process to effect change and achieve real school improvement

Balanced Assessment Systems Steve Chappuis, Carol Commodore, Rick Stiggins, 2016-07-20 Build a balanced assessment system and support ESSA implementation It has never been more important to develop balanced assessment systems that can provide meaningful information improve teaching practices and help students learn The Every Student Succeeds Act ESSA increases assessment flexibility and responsibilities for states and districts an opportunity to change assessment for the better Authors Chappuis Commodore and Stiggins have helped thousands of teachers principals and other educational leaders in becoming assessment literate and developing assessment systems built on quality assessment This comprehensive new guide provides clear steps and strategies for developing an assessment system and includes many interactive exercises designed for professional development and system implementation Readers will learn how to Create a balanced assessment system and analyze the progress being made within your school or district toward it Develop and implement assessment systems that are both formative measuring learning in progress and summative verifying learning that has taken place Take specific leadership actions that advance the balance and quality of assessment systems Help teachers integrate formative assessments into classroom instruction Empower students by involving them in the assessment process Take action now to make proactive positive changes in your school or district's approach to assessment
