Beyond Spinoff Military And Commercial Technologies In A Changing World:

Beyond Spinoff John A. Alic,1992 In a rapidly changing world there needs to be a critical reappraisal of traditional military industry relationships This book packed with data industry specific case studies and sophisticated analysis is such an appraisal It will be required reading for technology managers and policymakers in industry and government as well as those concerned with technological and economic competitiveness

Beyond Spinoff Harvard Business Review Staff,1992-04 In a rapidly changing world there needs to be a critical reappraisal of traditional military industry relationships This book packed with data industry specific case studies sophisticated analysis is such an appraisal It will be required reading for technology managers policymakers in industry government as well as those concerned with technological economic competitiveness

Beyond Spinoff ,1992 *The Advanced Technology Program* National Research Council,Policy and Global Affairs,Board on Science, Technology, and Economic Policy,2001-07-06 This report examines the operations of the ATP reviews its extensive assessment program and provides NRC Committee findings concerning the ATP s operations and recommendations for potential improvements to the program The report includes a summary of a major conference held in April 2000 as well as seven papers including surveys of the industry participants or users of the ATP program a summary of the results of fifty awards detailed assessments of major joint ventures and a description of the current selection process It is the most comprehensive study to date of the program s origins operations achievements and assessment Its conclusion the program works

Empowering Technology Lewis M. Branscomb,1993 experts from Harvard s Center for Science and International Affairs here examine a set of key issues and problems that taken together define the scope and limits of a technology policy

Reviewing the Cold War Odd Arne Westad,2013-10-14 Since the cold war ended it has become an international field of study with new material from China the former Soviet Union and Europe This volume takes stock of where these new materials have taken us in our understanding of what the cold war was about and how we should study it

Advanced Technology Program National Research Council,Technology and Economic Policy,Board on Science, Technology, and Economic Policy,1999-11-21 The growth in government programs to support high technology industry within national economies and their impact on international science and technology cooperation and on the multilateral trading system are of considerable interest worldwide Accordingly these topics were taken up by STEP in a study carried out in conjunction with the Hamburg Institute for Economic Research and the Institute for World Economics in Kiel One of the principal recommendations for further work emerging from that study was a call for an analysis of the principles of effective cooperation in technology development to include lessons from national and international consortia including eligibility standards and assessments of what new cooperative mechanisms might be developed to meet the challenges of international cooperation in high technology products

The East Asian Computer Chip War Ming-chin Monique Chu,2013-12-04 The semiconductor industry is a vital industry for military establishments worldwide and the control of or loss of control of this

key industry has enormous strategic implications This book focuses on the globalization of the strategic semiconductor industry and the security ramifications of this process It examines in particular the migration of the Taiwanese chip industry to China as part of the globalization of production processes and the extent to which such a globalization process poses security challenges to the United States China and Taiwan Transcending disciplinary boundaries between international political economy security studies and the history of science and technology this multidisciplinary work provides an in depth understanding of the globalization security nexus and disentangles the key policy issues connected to a potential explosive flashpoint in world politics today Science and Technology Advice for Congress M. Granger Morgan, Jon M.

Peha, 2003-09-10 The elimination of the Office of Technology Assessment OTA in 1995 came during a storm of budget cutting and partisan conflict Operationally it left Congress without an institutional arrangement to bring expert scientific and technological advice into the process of legislative decisionmaking This deficiency has become increasingly critical as more and more of the decisions faced by Congress and society require judgments based on highly specialized technical information Offering perspectives from scholars and scientists with diverse academic backgrounds and extensive experience within the policy process Science and Technology Advice for Congress breaks from the politics of the OTA and its contentious aftermath Granger Morgan and Jon Peha begin with an overview of the use of technical information in framing policy issues crafting legislation and the overall process of governing They note how as nonexperts legislators must make decisions in the face of scientific uncertainty and competing scientific claims from stakeholders The contributors continue with a discussion of why OTA was created They draw lessons from OTA's demise and compare the use of science and technological information in Europe with the United States The second part of the book responds to requests from congressional leaders for practical solutions Among the options discussed are expanded functions within existing agencies such as the General Accounting or Congressional Budget Offices an independent NGO administrated analysis group and a dedicated successor to OTA within Congress The models emphasize flexibility and the need to make political feasibility a core component of design **Is War**

Necessary for Economic Growth? Vernon W. Ruttan, 2006-01-05 Military and defense related procurement has been an important source of technology development across a broad spectrum of industries that account for an important share of United States industrial production In this book the author focuses on six general purpose technologies interchangeable parts and mass production military and commercial aircraft nuclear energy and electric power computers and semiconductors the INTERNET and the space industries In each of these industries technology development would have occurred more slowly and in some case much more slowly or not at all in the absence of military and defense related procurement The book addresses three questions that have significant implications for the future growth of the United States economy One is whether changes in the structure of the United States economy and of the defense industrial base preclude military and defense related procurement from playing the role in the development of advanced technology in the future

comparable to the role it has played in the past A second question is whether public support for commercially oriented research and development will become an important source of new general purpose technologies A third and more disturbing question is whether a major war or the threat of major war will be necessary to mobilize the scientific technical and financial resources necessary to induce the development of new general purpose technologies When the history of United States technology development in the next half century is written it will focus on incremental rather than revolutionary changes in both military and commercial technology It will also be written within the context of slower productivity growth than of the relatively high rates that prevailed in the United States in the 1950s and 1960s or during the information technology bubble that began in the early 1990s These will impose severe constraints on the capacity of the United States to sustain a global class military posture and a position of leadership in the global economy
